Janus Henderson Investors Europe S.A.

October 2026

PRODUCT KEY FACTS

JANUS HENDERSON HORIZON FUND – CHINA OPPORTUNITIES FUND

- **This statement provides you with key information about the China Opportunities Fund (the "Sub-Fund").**
- **This statement is a part of the offering document and must be read in conjunction with the Prospectus and the Hong Kong Covering Document.**
- **You should not invest in this product based on this statement alone.**

Quick facts

Fund Manager:	Janus Henderson Investors Europe S.A.		
Investment Manager:	Janus Henderson Investors UK Limited, London, UK (internal delegation)		
Sub-Investment Manager:	Janus Henderson Investors (Singapore) Limited, Singapore (internal delegation)		
Depositary:	BNP Paribas, Luxembourg Branch		
Ongoing charges over a year:			
	Class A1 USD	1.94%	
	Class A2 USD	1.93%	
	Class A2 EUR	1.93%	
	Class A2 SGD	1.94%	
	The ongoing charges figures are annualized figures calculated based on expenses chargeable to the respective Share Class of the Sub-Fund for the period from 1 July 2025 to 31 December 2025 expressed as a percentage of the average net asset value ("NAV") of the respective Share Class of the Sub-Fund over the same period. These figures may vary from year to year.		
Dealing frequency:	Daily		
Base currency:	US Dollar		
Distribution policy:	**For Accumulation Share Classes (sub-class 2 or Class A2):** There is no distribution for Accumulation Share Classes. Any gross income, net realised and unrealised capital gains will be accumulated and reflected in the capital value of the Share Class. **For Distribution Share Classes (sub-class 1 or Class A1):** Distributions, if declared at the Directors' discretion, will be paid to holders of the Distribution Share Classes– Sub-class 1 will distribute substantially all of the investment income for the relevant accounting period after the deduction of fees, charges and expenses (i.e. out of net investment income only). Distributions will not include realised and unrealised capital gains. **Distribution frequency:** Annual (within 4 weeks of 30 June each year. If the pay date is not a business day and, in the case of payments in US dollars, a day on which banks are not open for business in New York, payment will be made on the following day). The Directors may amend the distribution policy, where necessary, subject to the SFC's prior approval and by giving not less than one month's prior notice to investors.		
Financial year end:	30 June		
Minimum investment:			**Class A**
	USD	Initial Additional	$2,500 $500
	EUR	Initial Additional	€2,500 €500
	SGD	Initial Additional	SGD2,500 SGD500

What is this product?

The China Opportunities Fund is a sub-fund of the Janus Henderson Horizon Fund, constituted in the form of a mutual fund and domiciled in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier.

JANUS HENDERSON HORIZON FUND – CHINA OPPORTUNITIES FUND

Investment objective and investment strategy

Investment objective

The Sub-Fund aims to provide capital growth over the long term.

Investment strategy

The Sub-Fund invests at least 80% of its NAV in equities or equity-related instruments of:

- companies having their registered office in China and Hong Kong;
- companies that do not have their registered office in China and Hong Kong but do most of their business, either directly or through subsidiaries, in China and Hong Kong.

The Sub-Fund may invest in companies of any size, including smaller capitalisation companies, in any industry.

Equities may include China A-Shares, directly through the Stock Connect Programs and other eligible exchanges or indirectly through derivative instruments. Exposure to China A-Shares, whether directly or indirectly, will not be more than 50% of the Sub-Fund's NAV.

Equity-related instruments may include depositary receipts.

The Sub-Fund may use derivative instruments (such as futures, forwards, options and warrants) to reduce risk and to manage the Sub-Fund more efficiently. Under no circumstances shall the use of these instruments and techniques cause the Sub-Fund to diverge from its investment policy.

The Investment Manager ("IM") may from time to time consider hedging currency and interest rates exposure, but will not generally enter into contracts involving a speculative position in any currency or interest rate.

No more than 10% of the Sub-Fund's NAV may be invested in units of UCITS or other UCIs.

For the remaining assets, the IM has the flexibility to invest outside the Sub-Fund's principal geographies or asset classes.

For treasury management and/or defensive purposes (e.g. in case of unfavourable market conditions), the Sub-Fund may invest in:

- investment grade fixed income instruments (such as convertible bonds, corporate bonds and government bonds and their associated derivative instruments); and
- money market instruments and may hold cash or treasury bills pending reinvestment.

The Sub-Fund may engage in securities lending transactions. Lending transactions may not be carried out on more than 30% of the NAV of the Sub-Fund.

Currently, the Sub-Fund does not engage in repurchase transactions and/or reverse repurchase transactions (other than reverse repurchase transactions that may be entered into by the securities lending agent on behalf of the Sub-Fund in over-the-counter markets for reinvestment of cash collateral from the securities lending transactions for up to 30% of the NAV of the Sub-Fund).

The Sub-Fund may hold up to 20% of its net assets in ancillary liquid assets such as bank deposits at site, i.e. cash held in current accounts with a bank accessible at any time, in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets, or for a period of time strictly necessary in case of unfavourable market conditions. This restriction may only be exceeded temporarily for a period of time strictly necessary if the Directors consider this to be in the best interest of the Shareholders (e.g. during exceptionally unfavourable market conditions such as a severe financial market collapse).

Performance Target: The Sub-Fund targets to outperform the MSCI Zhong Hua 10/40 Index by 2.5% per annum, before the deduction of charges, over any 5-year period.

The Sub-Fund is actively managed with reference to the MSCI Zhong Hua 10/40 Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Sub-Fund's performance target. The IM has discretion to choose investments for the Sub-Fund with weightings different to the index or not in the index, but at times the Sub-Fund may hold investments similar to the index. The IM seeks to identify companies that can generate unexpected earnings growth, at both an industry and stock level, not yet recognised by the broader market.

Use of derivatives / Investment in derivatives

The Sub-Fund's Net Derivative Exposure may be up to 50% of the Sub-Fund's NAV.

What are the key risks?

Investment involves risks. Please refer to the Prospectus and Hong Kong Covering Document for details including the risk factors.

General investment risk

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

Equity and equity-related securities risk

- The value of equity and equity-related securities may be affected by various economic, political, market and issuer-specific factors and changes in investment sentiment. As a result, the value of such securities may be volatile and decline in value over short or even extended periods of time as well as rise. A fall in the value of equity and equity-related securities may adversely affect the NAV of the Sub-Fund.

Risks relating to securities lending

- Investors should note that if the borrower of securities lent by the Sub-Fund becomes insolvent or refuses to honour its obligations to return the relevant securities in a timely manner, the Sub-Fund would experience delays in recovering its securities and may possibly incur a capital loss which may adversely impact investors. The collateral received may realise at a value less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of the issuers of the collateral, or the illiquidity of the market in which the collateral is traded. Further, delays in the return of securities on loan may restrict the ability of the Sub-Fund to meet delivery obligations under security sales or payment obligations arising from realisation requests.

Risks relating to reverse repurchase transactions

- Reverse repurchase transactions may be entered into by the securities lending agent on behalf of the Sub-Fund for reinvestment of cash collateral received from the securities lending. In the event of the failure of the counterparty with which cash has been placed, the Sub-Fund may suffer loss as there may be delay in recovering cash placed out or difficulty in realising collateral or proceeds from the sale of the collateral may be less than the cash placed with the counterparty due to inaccurate pricing of the collateral or market movements.

Currency risk

- Assets of the Sub-Fund may be denominated in a currency other than the base currency (i.e. US Dollar) of the Sub-Fund. Also, a Share Class may be designated in a currency other than the base currency of the Sub-Fund. Changes in exchange rate control and changes in the exchange rate between the base currency and these currencies may affect the value of the Sub-Fund's assets as expressed in the base currency. Adverse fluctuations in currency exchange rates can result in a decrease in return and in a loss of capital which may have an adverse impact on the Sub-Fund.

Derivatives risk

- The use of FDIs can involve a higher level of risk. In adverse situations, the Sub-Fund's use of FDIs may become ineffective and the Sub-Fund may suffer significant losses. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the Sub-Fund. The use of FDIs also exposes the Sub-Fund to associated risks including counterparty risk, leverage risk, liquidity risk, volatility risk, valuation risk and over-the-counter transaction risk.

Market risk

- The value of the investments in the Sub-Fund may go up or down due to changing economic, political, regulatory, social development or market conditions that impact the share price of the companies that the Sub-Fund invests in. A fall in the value of the Sub-Fund's investment may cause a fall in the NAV of the Sub-Fund. There is no guarantee of the repayment of principal.

Emerging market risk

- Investments in emerging markets may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risks and the likelihood of a high degree of volatility. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well-developed regulatory systems and disclosure

standards may be less stringent than those of developed markets. Such risks could adversely affect the value of the Sub-Fund's investments and the NAV of the Sub-Fund.

Risk of investing in China securities

- The Sub-Fund's investment in China securities, i.e. China A-Shares and China A-Shares access products, may subject it to the following risks:

  RMB currency and conversion risks – Renminbi ("RMB") is currently not freely convertible and is subject to foreign exchange controls and restrictions which, under exceptional circumstances, may cause a delay in payment of redemptions and/or dividend payments in RMB. Although offshore RMB ("CNH") and onshore RMB ("CNY") are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

  Political risk - Any significant change in political, social or economic policies in the People's Republic of China ("PRC") may have a negative impact on investments in China securities and may adversely impact the value of the Sub-Fund.

  Taxation risk - The tax laws and regulations in the PRC in respect of capital gains realised via the Stock Connect Programs or access products on the Sub-Fund's investments in the PRC, are uncertain and may be expected to change or evolve as PRC's economy changes and develops. The application and enforcement of PRC tax laws and regulations may have retrospective effect and could have a significant adverse effect on the Sub-Fund and its investors, particularly in relation to capital gains withholding tax being imposed upon foreign investors. Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value. Based on professional and independent tax advice, the Sub-Fund does not currently intend to make any accounting provisions for these tax uncertainties because China A-Shares traded by the Sub-Fund are temporarily exempt from PRC corporate income tax. So for as long the temporary exemption is in force there are insufficient grounds for making any tax provisions. It is possible that any new PRC tax laws and regulations may be applied and the Company reserves the right to provide for withholding tax on dividends and capital gains tax in the future if it deems appropriate. Any new tax laws and regulations and any new interpretations may be applied retroactively.

  Market risk - Chinese accounting standards and practices may deviate significantly from international accounting standards. The settlement and clearing systems of the Chinese securities markets may not be well tested and may be subject to increased risks of error or inefficiency. The China A-Share market may be more volatile and unstable (for example, due to the risk of suspension of a particular stock or government intervention). It is possible that the PRC government, relevant PRC stock exchanges and/or relevant regulatory authorities may from time to time introduce new measures to control the risk of substantial fluctuations in the China A-Share market, such as a circuit breaker mechanism whereby the trading on the stock exchanges in China may be suspended if the trading limit of the relevant benchmark index reaches a specified threshold value under the circuit breaker mechanism. Market volatility and settlement difficulties in the China A-Share markets may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may affect the value of the Sub-Fund.

Risks associated with the Stock Connect Programs

- **Regulatory risk** - The relevant regulations are untested and subject to change which may have potential retrospective effect. There is no certainty as to how they will be applied.
- **Quota limitations** - The Stock Connect Programs are subject to a daily quota which does not belong to the Sub-Fund and can only be utilised on a first-come-first-served basis. This may restrict the Sub-Fund's ability to invest in China A-Shares through the program on a timely basis.
- **Suspension risk** - Where a suspension in the trading through the Stock Connect Programs is effected, the Sub-Fund's ability to access the PRC market will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.
- **Shenzhen Stock Exchange** - When investing in eligible China A-Shares through the Shenzhen Stock Connect, the Sub-Fund will also be subject to the risks associated with investment in shares listed on the ChiNext market of the Shenzhen Stock Exchange.

Concentration risk

- The Sub-Fund's instruments are concentrated in China and Hong Kong. The Sub-Fund will be more susceptible to and may be adversely affected by any single economic market, political, policy, foreign exchange, liquidity, tax, legal or regulatory occurrence affecting China and Hong Kong markets and the value of the Sub-Fund will be more volatile than a sub-fund that has a more diverse portfolio of investments.

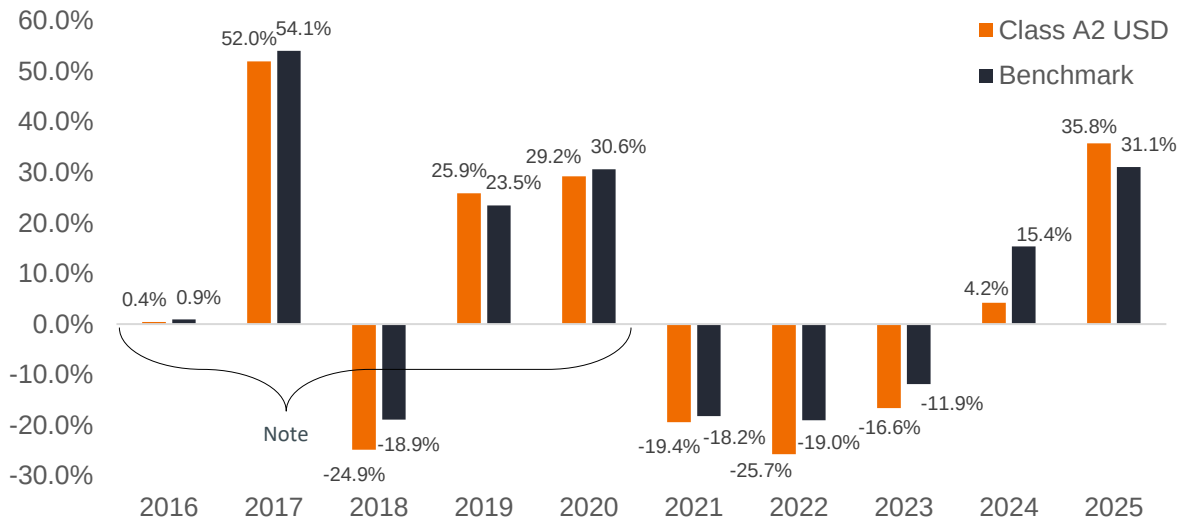

Liquidity risk

- Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.

Hedging risk

- Any attempts to reduce certain risks may not work as intended. Any measures that the Sub-Fund takes that are designed to offset specific risks may work imperfectly, may not be feasible at times, or may fail completely. To the extent that no hedge exists, the Sub-Fund or Share Class will be exposed to all risks that the hedge would have protected against.

How has the Sub-Fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with distributions reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- The benchmark is MSCI Zhong Hua 10/40 Index (as from 1 July 2020). Prior to 1 July 2020, the benchmark was MSCI China Index. The benchmark was changed to MSCI Zhong Hua 10/40 Index with effect from 1 July 2020 to more appropriately reflect the Sub-Fund's investment policy.
- Sub-Fund launch date: 2008
- Share Class A2 USD launch date: 2008
- The Investment Manager views Class A2 USD, being the retail Share Class denominated in the base currency of the Sub-Fund, as the most appropriate representative Share Class.
- Note: The performance of these years was achieved under circumstances that no longer apply as the investment policy of the Sub-Fund was changed since 1 July 2020.

Is there any guarantee?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund. A minimum prior notice period of 1 month except for management fee, will be provided to you in the event of a fee revision.

Fee	What you pay
