NOTICE TO SHAREHOLDERS
(the "Notice")

8 August 2025

Dear Shareholder,

We are writing to inform you of certain changes we are making to the Company and the Funds, which are summarised below.

The changes described in this Notice are not expected to have a material impact on investors or on the risk profile, investment strategy, or portfolio construction of the Funds, unless otherwise stated and will be effective on or around 8 September 2025 (the "**Effective Date**").

Please see "**Options Available to You**" below for further information on how to respond to this Notice.

1. Introduction of a minimum commitment in sustainable investments to certain Funds

From the Effective Date, the Funds currently promoting environmental and / or social characteristics pursuant to article 8 of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "**SFDR**") listed in the table below (collectively, the "**Article 8 Funds**") will adopt a new commitment to also invest a minimum percentage of their respective net asset value in sustainable investments.

Article 8 Fund	Minimum commitment of net asset value in sustainable investments
Biotechnology Fund	10%
Japan Opportunities Fund	10%

Why have we decided to include the commitment?

Janus Henderson Investors Europe S.A., as the management company to the Company (the "**Management Company**"), continuously monitors and performs assessments of the Funds to ensure they continue to meet client expectations and needs. Feedback from clients suggests there is demand for the Article 8 Funds to commit a minimum level of exposure to sustainable investments. In response to this demand, the Management Company, on the recommendation of the Investment Manager, has decided to introduce a minimum commitment in sustainable investments for the Article 8 Funds.

What do we mean by sustainable investments?

The Investment Manager will use its sustainable investment methodology to determine which investments may be considered sustainable investments.

The Investment Manager uses a pass/fail test meaning that each sustainable investment must meet all three of the requirements below:

1. based on revenue mapping to UN Sustainable Development Goals or having a carbon emissions target approved by the Science Based Targets initiative (SBTi), it contributes to an environmental or social objective;
2. it does not cause significant harm to any environmental or social sustainable investment objective; and
3. it follows good governance practices.

There will be no transaction costs associated with the above amendments as there will be no changes to the Article 8 Funds' existing portfolios.

A summary of the amendments added to the pre-contractual disclosures of the Article 8 Funds is included in **Appendix A**.

2. <u>Update to minimum sustainability thresholds for the Biotechnology Fund</u>

From the Effective Date, the minimum thresholds used by the Biotechnology Fund to assess compliance of the Fund's environmental or social characteristics will be updated to better manage data coverage limitations of third-party data providers. The updated thresholds better reflect the data coverage provided by third-party data providers and enables a more accurate assessment of the Fund's compliance with the environmental and/or social characteristics promoted by the Fund.

There will be no changes to the Fund's existing portfolio as a result of these changes.

3. Update of an ESG exclusionary screen description for the Japan Opportunities Fund

From the Effective Date, the reference to the exclusionary revenue screen applied to corporate issuers invested by the Japan Opportunities Fund will be updated from 'military contracting' to 'conventional weapons'. This refinement is intended to align the prospectus wording more closely with the underlying exclusionary screen that is already being applied to the Fund. There is no change to the methodology or investment process as a result of this change.

4. Update of the principal adverse impact compliance status of the Management Company

From 13 August 2025, the sub-section of the Prospectus titled "*Principal Adverse Impacts – All Funds*" will be revised to clarify that the Management Company will consider the principal adverse impacts of investment decisions on sustainability factors, in accordance with the regime outlined in Article 4 of the Sustainable Finance Disclosure Regulation (SFDR).
