

# GLOBAL EQUITY MARKET NEUTRAL FUND

## An attractive diversifier

A long/short equity market neutral portfolio that seeks positive absolute returns regardless of market conditions. We believe by combining fundamental stock picking with a quantitative portfolio construction and systematic risk management framework, we can help to diversify returns drivers and minimise unintended risks.

## Why invest in the fund

### Market neutral

Our market neutral approach removes over-reliance on directionality, and an active equity long-short construct can deliver alpha from both winners and losers.

### Best ideas

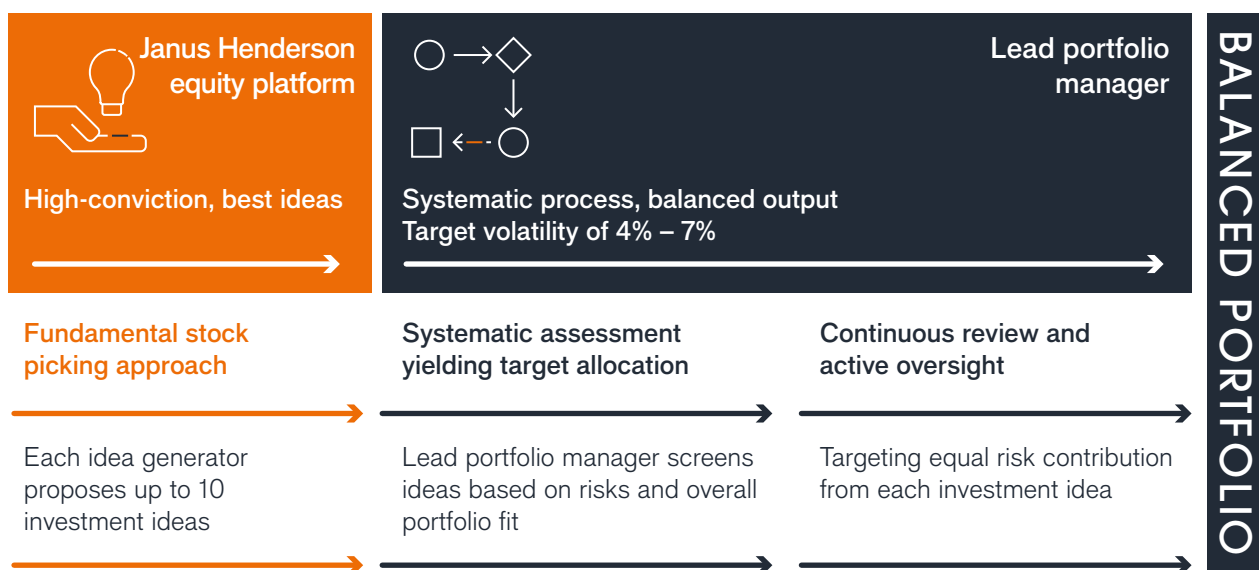

Stock picking experts from across the firm provide fundamentally researched, high-conviction ideas, diversified by region, sector and style. Ideas consist of a long and short idea linked by an investment thesis.

### Quantitative construction

The lead portfolio manager applies systematic portfolio construction focused on capturing pure alpha and effectively allocating risk. We believe blending different investment styles and processes can deliver absolute returns across various market environments.

## Building a balanced portfolio

Note: There is no assurance the stated objectives will be met.
