<p><b>KEY RISKS</b></p>	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p><b>The value of Shares of the Fund and the income (if any) from them may rise or fall. You may lose all of your principal investment. These risk factors may cause you to lose some or all of your investment:</b></p>	<p>Refer to “Risk Factors” in the Singapore Prospectus for further information on risks of the product.</p>
<p><b>Market and Credit Risks</b></p>	
<ul style="list-style-type: none"> <li>• <b>You are exposed to the market risks in global markets.</b> Your investments may go up or down due to changing economic, political or market conditions that impact the price of the fixed income securities and financial derivative instruments that the Fund invests in.</li> <li>• <b>You are exposed to interest risk and credit risk.</b> The performance of the Fund depends primarily on interest rate risk and credit risk. Interest rate risk is the risk that the value of a portfolio will fluctuate in response to changes in interest rates. Credit risk is the risk that an issuer will be unable to make principal and interest payments when due.</li> <li>• <b>You are exposed to market risks in Developing Markets.</b> Developing markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be well regulated with less robust custody and settlement procedures.</li> </ul>	

<ul style="list-style-type: none"> <li>• <b>You are exposed to currency risks.</b> Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall.</li> </ul>													
<b>Liquidity Risks</b>													
<ul style="list-style-type: none"> <li>• <b>The Fund is not listed and you can redeem only on Business Days.</b> There is no secondary market for the Fund. All redemption requests should be made to the authorised agents or distributors.</li> <li>• <b>Flexibility in redemption may be restricted.</b> The Fund may suspend the determination of the NAV of the Shares of the Fund and the sale or repurchase of such Shares in certain circumstances.</li> <li>• <b>You are exposed to liquidity risk.</b> Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment loss.</li> </ul>													
<b>Product-Specific Risks</b>													
<ul style="list-style-type: none"> <li>• <b>You are exposed to the risks of High Yield Bonds.</b> The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.</li> <li>• <b>You are exposed to the risks of derivatives and leverage.</b> The Fund intends to use or invest in financial derivative instruments other than for the purposes of hedging and/or efficient portfolio management, including for investment purposes. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.</li> <li>• <b>Capital erosion risk.</b> Some distributing share class may distribute realised and unrealised capital gains and original capital invested. Fees, charges and expenses are also deducted from capital. Both factors may result in capital erosion and reduced potential for capital growth. Investors should also note that distributions of this nature may be treated (and taxable) as income depending on local tax legislation.</li> </ul>

**VALUATIONS AND EXITING FROM THIS INVESTMENT**

**HOW OFTEN ARE VALUATIONS AVAILABLE?**

- The last available NAV of the Shares of the Fund for the relevant Business Day may be obtained two days after that Business Day from the website [www.janushenderson.com/sg](http://www.janushenderson.com/sg).

**HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?**

- You can exit the Fund at on any Business Day using any relevant forms through an authorised agent or distributor or any other sales channels, if applicable.
- However, you will have to take the risk for any price changes in the NAV of the Fund since it was purchased. The applicant has no right to cancel the deal, but can sell back their shares to the Fund with associated costs.
- You will normally receive the redemption proceeds within 4 Singapore Business Days from the time your request to exit from the Fund is received and accepted.
- Redemption requests received by the Administrator prior to the Trade Cut-Off Times on that Business Day will be processed at the net asset value per Share determined on that Business Day. Redemption requests received after such time will be processed at the net asset value per Share determined on the next Business Day. The relevant distributors in Singapore may impose their own earlier dealing deadlines in order to meet the Administrator's dealing deadline.
- The redemption proceeds will be calculated by multiplying the number of Shares to be redeemed by the redemption price per Share when it has been ascertained later and then deducting any applicable trading fee.
- Numerical examples of calculation of redemption proceeds are as follows:

e.g.	1,000 Shares Redemption Request	x	US\$10.01* Net asset value	=	US\$10,010.00 Redemption Proceeds
------	---------------------------------------	---	-------------------------------	---	---

OR

e.g.	1,000 Shares Redemption Request	x	US\$9.50* Net asset value	=	US\$9,500.00 Redemption Proceeds
------	---------------------------------------	---	------------------------------	---	--

\* For illustrative purposes only. The redemption price depends on the NAV at the relevant time and may be above or below the original purchase price.

Refer to the "Subscription for Shares", "Redemption of Shares" and "Obtaining Price Information" in the Singapore Prospectus for further information on valuation and exiting from the product.
