### Ratings

Morningstar - ★★★★★

### Fund aim

Janus Henderson Balanced Fund's dynamic asset allocation strategy has the flexibility to defensively position ahead of market volatility while seeking strong risk-adjusted returns. Unlike many competitor products, where asset allocations are constrained by static targets, the fund's asset allocations may vary between 35% and 65% equities depending on market conditions.

### Key points

- Dynamic asset allocation based on market risk and individual security valuations.
- Integrated research facilitates deepened understanding of management's true intentions.
- Seeks consistent results with the flexibility to navigate uncertain and volatile markets.

### Additional information

No Morningstar rating is shown if the fund is less than three years old or rating is below 3 stars. A short-term trading fee may be applied upon exiting the fund as per the prospectus. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. This is an Irish Investment Company regulated by the Central Bank of Ireland.

### Fund managers

Marc Pinto, CFA, Jeremiah Buckley, CFA, Mayur Saigal, Michael Keough

**What are the risks specific to this fund?**

- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.
- When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.
- The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- Some or all of the Annual Management Charge and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

**General risks**

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
