### Codes

ISIN: IE00BD0YVK93

Sedol: BD0YVK9

Valor: 37546379

WKN: A2DUXD

### Objective and investment policy

The Fund aims to provide positive, consistent returns (although not guaranteed) above those that would be earned on cash deposits over time over the long term.

Performance target: To outperform the Bloomberg 1 month US Treasury Bill Index by 1% per annum, before the deduction of charges, over any 5 year period.

The Fund invests in a globally diverse portfolio of company shares (also known as equities) and equity-related investments, bonds of any type, cash and money market instruments. The Fund may gain its exposure to these assets either directly, via other funds (collective investment schemes, including exchange traded funds), and investment trusts/companies, or by using derivatives (complex financial instruments). The investment manager has flexibility to shift allocations between different asset classes and may invest up to 100% of its assets in any of these classes, depending on prevailing market conditions. The Fund has no specific geographical or industrial focus and may invest in developing countries.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the Bloomberg 1 month US Treasury Bill Index, as this forms the basis of the Fund's performance target. The investment manager has a high degree of freedom to choose individual investments for the Fund.

### Additional information

Please note that as of 18 February 2020 the benchmark changed from 3 Month Libor to the Bloomberg Barclays 1 Month US Treasury Bill Index. From 1st June 2020 Ed Parcell no longer manages this fund. Ashwin Alankar is now the sole fund manager.

No Morningstar rating is shown if the fund is less than three years old or rating is below 3 stars. A short-term trading fee may be applied upon exiting the fund as per the prospectus. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. This is an Irish Investment Company regulated by the Central Bank of Ireland.

### Cumulative Performance in (USD)

Percentage growth, 24 May 2017 to 30 Sep 2021.

## What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.
- When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.
- Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures.
- This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.
- The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

## Important information

The investments underlying this financial product (referred to as the Fund) do not take into account the EU criteria for environmentally sustainable economic activities. While the analysis of ESG factors is an integral component across the Investment Manager's investment capabilities, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the Fund. The Investment Manager does not consider the adverse impacts of investment decisions on sustainability factors as set out under SFDR with respect to the Fund because it is not classified under either Article 9 or Article 8 of Regulation (EU) 2019/2088. Source: Janus Henderson Investors. All ongoing charges stated are as per latest published report and accounts. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%.
