JANUS HENDERSON CAPITAL FUNDS PLC - JANUS HENDERSON MULTI-SECTOR INCOME FUND

A4m USD ISIN IE00BJVNGR98

Key investment risks:
-The Fund invests in debt securities/ preference shares (including below investment grade or unrated) and asset/ mortgage-backed securities; and is subject to greater interest rate, credit/ counterparty, volatility, liquidity, downgrading, valuation, credit rating risks. It may be more volatile.
-Investments in the Fund involve general investment, currency, hedging, economic, political, policy, foreign exchange, liquidity, tax, legal, regulatory, securities financing transactions related and preference shares related risks. In extreme market conditions, you may lose your entire investment.
-The Fund may invest in financial derivatives instruments for investment and efficient portfolio management purposes. This may involve counterparty, liquidity, leverage, volatility, valuation, over-the-counter transaction, credit, currency, index, settlement default and interest risks; and the Fund may suffer total or substantial losses.
-The Fund's investments are concentrated in US issuers and may be more volatile.
-The Fund may at its discretion pay dividends (i) pay dividends out of the capital of the Fund, and/ or (ii) pay dividends out of gross income while charging all or part of the fees and expenses to the capital of the Fund, resulting in an increase in distributable income available for the payment of dividends by the Fund and therefore, the Fund may effectively pay dividends out of capital. This may result in an immediate reduction of the Fund's net asset value per share, and it amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
-Investors should not only base on this document alone to make investment decisions and should read the offering documents including the risk factors for further details.

Investment Objective and Strategy

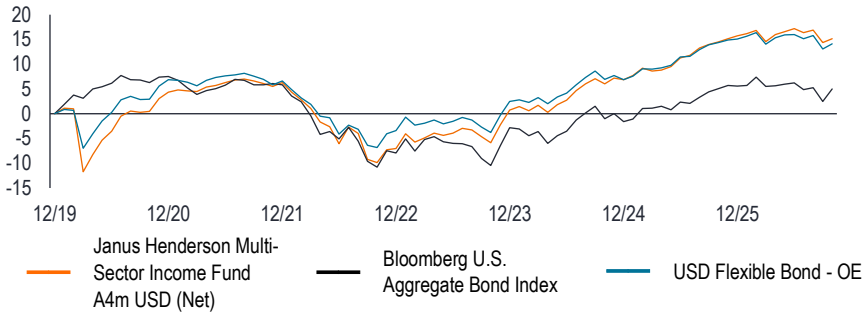

The Fund aims to seek a high income with the potential for some capital growth over the long term. The Fund invests at least 70% of its assets in US issuers in a global multi-sector portfolio of debt securities of any quality, including asset-backed and mortgage-backed securities, high-yield securities, including non-investment grade or unrated securities, issued by governments, companies or any other type of issuer.

Bond credit quality ratings provided by Janus Henderson Investors are based on the existing JHI house-derived rating, which uses ratings from Moody's, Standard & Poor's and Fitch. Where no ratings are available from these three agencies, Kroll and DBRS are used. Where both Kroll and DBRS ratings are available, an average of the two is used. Where only one rating is available, that rating is used. Ratings are measured on a scale that ranges from Aaa (highest) to B, with any lower ratings grouped into 'Below B' (lowest).

Fees & charges (%)

Maximum initial sales charge	5.00
Annual management charge (AMC)	0.70

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com. Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. From 31 December 2025, Colin Fleury no longer manages this fund. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is an Irish Investment Company regulated by the Central Bank of Ireland. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. A short-term trading fee may be applied upon exiting the fund as per the prospectus. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date. Dividend amount or dividend rate is not guaranteed. Positive dividend does not mean positive return. Distributions may be paid out of capital.

Source for fund ratings/awards

Where available, overall Morningstar Rating™ is shown for share classes achieving a rating of 4 or 5 stars.

Glossary

Asset-backed securities (ABS)
A financial security which is 'backed' with assets such as loans, credit card debts or leases. They give investors the opportunity to invest in a wide variety of income-generating assets.

Discount
When the market price of a security is thought to be less than its underlying value, it is said to be 'trading at a discount'. Within investment trusts, this is the amount by which the price per share of an investment trust is lower than the value of its underlying net asset value. The opposite of trading at a premium.

Duration
Duration can measure how long it takes (in years) for an investor to be repaid a bond's price by the bond's total cash flows. Duration can also measure the sensitivity of a bond's or fixed-income portfolio's price to changes in interest rates. The longer a bond's duration, the higher its sensitivity to changes in interest rates, and vice versa. 'Going short duration' refers to reducing the average duration of a portfolio, while 'going long duration' refers to extending a portfolio's average duration.

Future
A contract between two parties to buy or sell a tradable asset, such as shares, bonds, commodities or currencies, at a specified future date at a price agreed today. A future is a form of derivative.

High yield bond
A bond which has a lower credit rating below an investment grade bond. It is sometimes known as a sub-investment grade bond. These bonds usually carry a higher risk of the issuer defaulting on their payments, so they are typically issued with a higher coupon to compensate for the additional risk.

Mortgage-backed security (MBS)
A security which is secured (or 'backed') by a collection of mortgages. Investors receive periodic payments derived from the underlying mortgages, similar to coupons. Similar to an asset-backed security.

Option
A derivative instrument where one party pays/receives the total return of the underlying asset or market index, in exchange for payments typically linked to LIBOR.

Secured loan
A loan where the borrower has promised to give the lender certain assets if they fail to make repayments.

Swaps
A derivative contract between two parties where pre-determined cash flows of two financial instruments are exchanged. Swaps can help to hedge risk and minimise uncertainty; for example currency swaps can be used to minimise foreign currency exposure.

Tracking error
This measures how far a portfolio's actual performance differs from its benchmark index. The lower the number, the more closely it resembles the index.

WAM (Weighted Average Maturity)
The average time remaining until the maturity of assets in a portfolio.

Yield to worst
The lowest yield a bond with a special feature (such as a call option) can achieve provided the issuer does not default. When used to describe a portfolio, this statistic represents the weighted average across all the underlying bonds held.
