WKN: 935591

### Objective and investment policy

The Fund aims to provide capital growth over the long term.  
Performance target: To outperform the MSCI World Health Care Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

The Fund invests in shares (also known as equities) of companies, of any size, with a life sciences orientation, in any country. The Fund is actively managed with reference to the MSCI World Health Care Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose individual investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

### Additional information

Effective 1 May 2019, Andy Acker, Portfolio Manager and Health Care Sector Team Lead, will continue to lead the strong team of healthcare sector analysts and maintain the firm's team-based approach to healthcare investing.

No Morningstar rating is shown if the fund is less than three years old or rating is below 3 stars. A short-term trading fee may be applied upon exiting the fund as per the prospectus. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. This is an Irish Investment Company regulated by the Central Bank of Ireland.

The ongoing charges includes fees payable to Distributors. Where the ongoing charges exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the Fund's outperformance target (before the deduction of charges) has been achieved.

### Cumulative Performance in (EUR)

Percentage growth, 30 Apr 2015 to 30 Apr 2020.

## What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund is focused towards particular industries or investment themes and may be heavily impacted by factors such as changes in government regulation, increased price competition, technological advancements and other adverse events.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
