DYNAMIC TREND FUND

I2 USD ISIN LU2616029208

Investment objective

The Fund aims to generate positive (absolute) returns, regardless of market conditions, over any 3-year period. A positive return is not guaranteed over this or any time period and, particularly over the shorter term, the Fund may experience periods of negative returns. Consequently, your capital is at risk. Performance Target: To outperform the Secured Overnight Financing Rate by at least 4% per annum, before the deduction of charges, over any 3-year period.

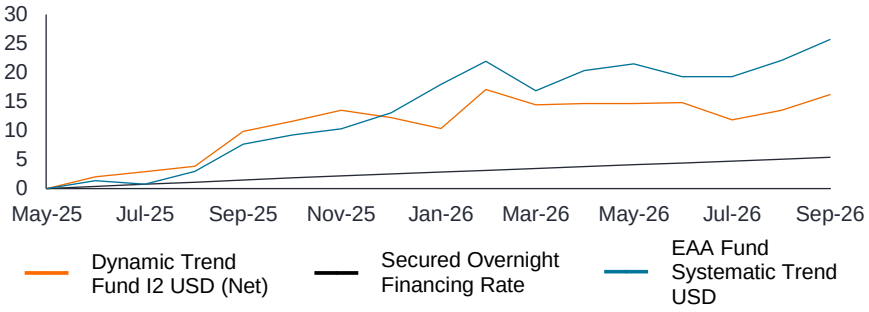

For the fund's investment policy, refer to the Additional fund information on page 3.
Past performance does not predict future returns.

Valoren	127024381

Fees & charges (%)

Annual management charge (AMC)	1.00
Performance fee description	10% of any returns that subject to a high water mark the share class achieves above the Secured Overnight Financing Rate
Estimated ongoing charge (OCF)	1.12

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Performance fees may be charged before the Fund's outperformance target is reached.

Performance fees are charged separately as a way of rewarding the investment manager for superior returns or for outperforming specified targets. A Performance Fee is accrued where the NAV outperforms the relevant Hurdle NAV (subject to a High Water Mark). For further explanation of the performance fee calculation methodology please see the relevant prospectus, available at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target wording within the objective. The performance data does not take account of the initial charge and Janus Henderson does not currently levy a redemption charge. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. The performance fee described on page 2 will be applicable if the fund achieves a return in excess of the High Water Mark and the Secured Overnight Financing Rate. Investors should refer to the prospectus for full details on performance fee where a performance fee is applicable. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Investment policy

The Fund invests in a global, diversified portfolio of derivatives (complex financial instruments), including index futures, interest rate futures, short-term interest rate futures, equity futures, bond futures, currency futures, swaps (such as index credit default swaps, interest rate swaps and total return swaps) contracts for difference, options and forwards. The use of derivatives is extensive. Exchange traded futures and total return swaps are core to the investment strategy and used on a predominant basis. Other derivatives may be used on an ancillary basis and as market conditions dictate. The Fund may also gain exposure to fixed income (debt) instruments such as investment grade government bonds and investment grade or high yield corporate credit indices accessed through derivatives. There is no limit on the debt securities or government securities rated below investment grade, but any such exposure is expected to be small. The Fund may also gain indirect exposure to commodities using eligible Transferable Securities (such as structured notes) and/or derivatives whose underlying assets consist of commodity indices. Allocations across asset classes will be made at the Investment Manager's discretion and the Fund need not be invested in all asset classes at any one time. It follows an unconstrained investment approach, with no regional or sector constraints. The Fund will hold a substantial proportion of its assets in cash, bank deposits and money market instruments as a result of holding derivatives or for asset allocation purposes. The Fund is actively managed and makes reference to the Secured Overnight Financing Rate, as this forms the basis of the Fund's Performance Target and the level above which performance fees may be charged (if applicable). The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

Investment strategy

The Investment Manager employs a systematic (rules based) trend following strategy, which aims to capture trends across a diverse range of assets through a combination of synthetic long and synthetic short investment positions to achieve positive returns with low correlation to traditional assets, as well as attempting to preserve capital and manage risk. The strategy is designed to take long positions in positively trending assets and short positions in negatively trending assets by using a crossover trend signalling model, which captures these trends and turning points in markets. All investment decisions, whilst informed by the signalling model, are assessed and executed by the Investment Manager who actively determines portfolio positioning.

Fund specific risks

When interest rates rise (or fall), the prices of different bonds will be affected differently. In particular, bond prices generally fall when interest rates rise or are expected to rise. Funds investing in Bonds with higher sensitivity and funds which may invest a significant portion in related derivatives such as interest rate swaps or interest rate futures can be more affected. If the Fund invests significantly in these instruments, rising rates may negatively impact returns. An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall. High yielding (non-investment grade) bonds are more speculative and more sensitive to adverse changes in market conditions. When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment. Emerging markets expose investors to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. The Fund's exposure to commodities may be subject to rapid and substantial price movements resulting in high volatility. Developments affecting commodities instruments, such as changes in supply and demand, government programs and policies, political events and changes in interest rates may have an impact on the Fund. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. The Fund uses a proprietary trading model, using quantitative analysis and algorithms to select positively or negatively trending investments. There is a risk that the investments selected using the model may perform differently than expected and may not achieve positive returns or outperform. Where the model relies on data and technology risks include inaccurate data and system failures. These are mitigated through the Investment Manager's internal governance and oversight processes.

Source for fund ratings/awards

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. The risk indicator assumes you keep the product for 5 years. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Glossary

Historic Yield
The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

Janus Henderson
INVESTORS

Any investment application will be made solely on the basis of the information contained in the Fund's prospectus (including all relevant covering documents), which will contain investment restrictions. This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions. A copy of the Fund's prospectus and key information document can be obtained from Janus Henderson Investors UK Limited in its capacity as Investment Manager and Distributor. Nothing in this document is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. The performance data does not take into account the commissions and costs incurred on the issue and redemption of

units. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially. The Fund is a recognised collective investment scheme for the purpose of promotion into the United Kingdom. Potential investors in the United Kingdom are advised that all, or most, of the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Fund and that compensation will not be available under the United Kingdom Financial Services Compensation Scheme. We may record telephone calls for our mutual protection, to improve customer service and for regulatory record keeping purposes. For sustainability related aspects please access Janushenderson.com. With effect from 1 January 2023, the Key Investor Information document (KIID) changed to the Key Information Document (KID), except in the UK where investors should continue to refer to the KIID.
