Fund facts at 30 September 2019

Company objective
The Company’s objective is to provide long term growth in income and capital, principally by investment in UK equities. The Board continues to recognise the importance of dividend income to shareholders. The latest Annual Report and Key Information Document set out the investment objective and policy in full and you should read them before investing. For commentary from our fund manager please visit our website.

| NAV (cum income) | 413.6p |
| NAV (ex income)  | 408.4p |
| Share price      | 420.5p |
| Discount/premium | +1.7%  |
| Yield            | 4.47%  |
| Net gearing      | 8%     |
| Total assets     | £1743m |
| Net assets       | £1580m |
| Market capitalisation | £1606m |
| Shares in issue  | 381,934,868 |
| Total number of holdings | 97 |
| Ongoing charges  | 0.39% (year end 30/06/2019) |

Source: BNP Paribas for holdings information and Morningstar for all other data. Differences in calculation may occur due to the methodology used.

Share price performance (total return)

Dividend history (pence/share)

Discount/premium (%) with average line (cum income)

Cumulative performance (cum income) (%)

Annual performance (cum income) (%)

Discrete year performance % change (updated quarterly)

Top 10 holdings (%)

Geographical focus (%)

Sector breakdown (%)

Please remember that past performance is not a guide to future performance. The value of an investment and the income from it can rise as well as fall as a result of market and currency fluctuations, and you may not get back the amount originally invested.

Regional focus: UK

Fund manager appointment: 1991

Glossary

NAV (Cum Income) The value of investments and cash, including current year revenue, less liabilities (prior charges such as loans, debtenure stock and preference shares at fair value).

NAV (Ex Income) The value of investments and cash, excluding current year revenue, less liabilities (prior charges such as loans, debtenure stock and preference shares at fair value).

Share price Closing mid-market share price at month end.

Discount/premium The amount by which the price per share of an investment trust is either lower (at a discount) or higher (at a premium) than the net asset value per share (cum income), expressed as a percentage of the net asset value per share.

Total assets Cum Income NAV multiplied by the number of shares, plus prior charges at fair value.

Net assets Total assets minus any liabilities such as bank loans or creditors.

Market capitalisation Month end closing mid-market share price multiplied by the number of shares outstanding at month end.

Share price total return The theoretical total return to the investor assuming that all dividends received were reinvested in the shares of the company at the time the shares were quoted ex-dividend. Transaction costs are not taken into account.

Net asset value total return The theoretical total return on shareholders’ funds per share reflecting the change in Net Asset Value (NAV) assuming that dividends paid to shareholders were reinvested at NAV at the time the shares were quoted ex-dividend. A way of measuring investment management performance of investment trusts which is not affected by movements in discounts/premiums.

Yield Calculated by dividing the current financial year’s dividends per share (this will include prospective dividends) by the current price per share, then multiplying by 100 to arrive at a percentage figure.

Ongoing charges The total expenses for the financial year (excluding performance fee), divided by the average daily net assets, multiplied by 100.

Specific risks

- Not all the investments in this portfolio are made in Sterling, so exchange rates could affect the value of and income from your investment.
- If a fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.
