Janus Henderson

Institutional UK Equity Tracker Trust Class A Inc ISIN: GB0004489455

A unit trust, managed by Janus Henderson Fund Management UK Limited.
Fund Currency: GBP Unit Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income over the long term.

Performance target: To replicate the performance of the FTSE All Share Index, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests in shares (also known as equities) of companies, of any size, in any industry, in the UK. Companies will normally be constituents of the FTSE All Share Index.

The Fund may also hold other assets including cash and money market instruments.

The Investment Adviser may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is an index tracker, passively managed with reference to the FTSE All Share Index, which represents the universe of companies in which it may invest and is the Fund's performance target. The Investment Adviser has limited ability to exercise discretion with the Fund's portfolio largely determined by the composition of the index. However, optimisation techniques may be used with the intention of tracking the performance of the index more efficiently, which may mean the Fund holding less constituents than the index or having weightings different to the index.

As an additional means of assessing the performance of the Fund, the IA UK All Companies sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The Investment Adviser looks to achieve returns closely matching that of the FTSE All-Share Index. The fund is structured as an index-tracking fund, which replicates an index by investing in selected constituent stocks in the index. In normal market conditions the level of annual tracking error (the extent to which the fund's investments differ from the index) is expected to be around 0.5%.

Distribution policy The Fund offers income units (units in which net income is paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch units in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Fund's Prospectus.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	3	4	**5**	6	7

The value of an investment and any income from it can go up or down. When you sell your units they may be worth less than you paid for them.

The rating above is based on the historic volatility of the unit class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The unit class appears at 5 out of 7. Units in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Index Tracking The performance of the Fund is not expected to precisely match the performance of the index at all times and the deduction of fees and expenses means the Fund might deliver a lower total return than the index.

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Country or Region High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Derivatives Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Fund's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	4.50%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

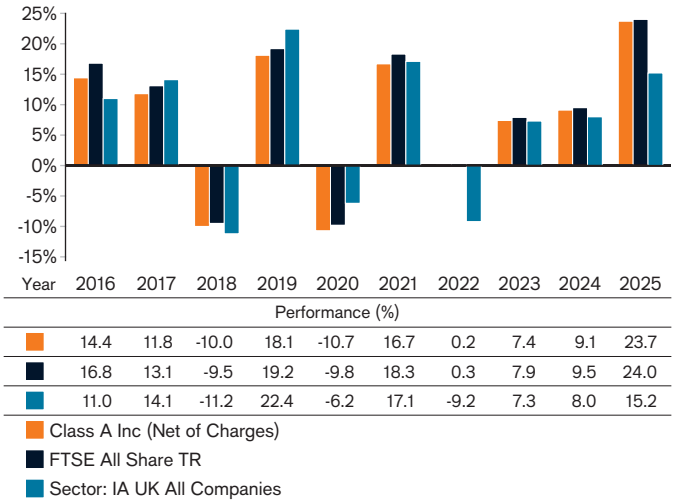

Ongoing Charges	0.29%

The ongoing charges are based on actual annualised expenses for the period ending 31 August 2025. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Fund's Prospectus.
