

# INSTITUTIONAL LONG DATED CREDIT FUND

Class A Inc ISIN: GB0007475238  
 Fund Currency: GBP Share Class Currency: GBP

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Henderson Investment Funds Limited.

## Objective and investment policy

### Objective

The Fund aims to provide an income with the potential for capital growth over the long term.

Performance target: To outperform the Markit iBoxx GBP Non-Gilts greater than 15 years to maturity Index by 1% per annum, before the deduction of charges, over any 5 year period.

### Investment policy

The Fund invests at least 80% of its assets in Sterling-denominated investment grade (equivalent to BBB rated or higher) corporate bonds, typically with maturities of 15 years or more. (Longer dated bonds are generally more sensitive to changes in interest rates and may at times exhibit significant volatility.)

The Fund may also hold other assets including bonds of other types from any issuer, cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the Markit iBoxx GBP Non-Gilts greater than 15 years to maturity Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Sterling Corporate Bond sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

### Strategy

The investment manager seeks to provide a total return in excess of that generated by the benchmark through investing primarily in long maturity (over 15 years) sterling denominated, investment grade rated corporate bonds. The investment process combines asset allocation views with rigorous fundamentally driven security selection, which allows the managers to determine key economic themes and identify which industry sectors to favour or avoid.

**Distribution policy** The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

## Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Default Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates and Longer Maturity Bonds** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular,

bond values generally fall when interest rates rise or are expected to rise. This is especially true for bonds with a longer time to maturity. A high portion of this fund is invested in longer maturity bonds and so rising interest rates can pose a significant risk to capital.

**Contingent Convertible Bonds (CoCos)** CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares of the issuer or to be partly or wholly written off.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Counterparties** The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

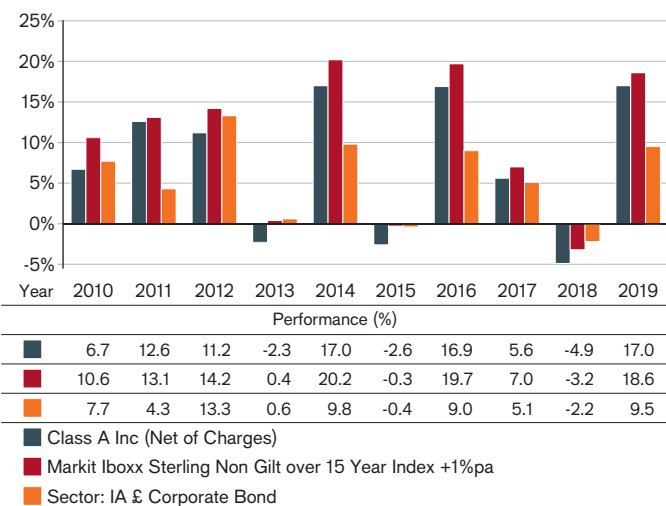

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	4.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

## Past performance

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

### Charges taken from the Fund over a year

Ongoing Charges	0.90%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 30 June 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

The past performance is calculated in GBP.

The Fund was launched in April 1987 and the share class was launched in April 1997.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the Share Class after the deduction of charges.

The Fund does not aim to track the performance of the index.
