

INSTITUTIONAL NORTH AMERICAN INDEX OPPORTUNITIES FUND

Class A Acc ISIN: GB00B0LYSH38
Fund Currency: GBP Share Class Currency: GBP

A sub-fund of Janus Henderson Strategic Investment Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a return, of at least that achieved by the Solactive GBS North America customised Index (the reference index) +0.5% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of companies, of any size, in any industry, which are included in the reference index.

The Fund may also invest in other assets including bonds, Collective Investment Schemes (including those managed by Janus Henderson), cash and money market instruments, and may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is in part passively managed as its investments in at least 80% of its assets within shares of the reference index seek to replicate the components of the reference index. The components of the reference index will not be identically replicated, and this can lead to differences in performance. The 'customised' aspect of the reference index indicates that its performance is adjusted to reflect the actual tax rates applicable to dividend income received by the fund.

Strategy

The investment manager seeks to reflect the performance of the reference index while making use of investment strategies aimed at enhancing

returns whilst taking a low level of additional risk. Some strategies used by the Investment Manager seek to generate returns based on differences in the prices of securities issued by, or associated with, companies that form part of the reference index. They can include, but are not limited to, liquidity strategies (investing in 'blocks of stock' at discounted prices), and relative value strategies (taking advantage of differences between the prices of securities related to the same company. Other strategies may not be related specifically to the reference index and can be outside North America to the extent that those strategies remain consistent with the Fund's Investment Objective and Policy as set out above. Further details explaining the investment strategies are available on the Funds' pages on our website (www.janushenderson.com).

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage',

which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Index Opportunities Returns from investing in index enhancing opportunities may vary over time relative to the reference index. The managers do not, however, seek to take high levels of risk and investors should therefore expect the typical level of enhancement of returns to be low. Strategies aimed at enhancing returns depend on the manager skill and decision-making; this therefore carries the risk that a Fund may underperform its reference index if the strategy used is unsuccessful. Additionally, depending on the share class you invest in and any costs you pay to third parties to invest in our funds, after the deduction of ongoing charges and transaction costs your investment may underperform the reference index.

Counterparties The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge 5.00%

Exit Charge 0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

Past performance

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Performance (%)	18.3	-0.8	7.1	27.4	18.8	3.1	33.2	9.9	-1.6	26.9
	18.7	0.9	10.3	27.9	19.2	5.0	33.7	10.9	0.5	26.1
	17.2	-2.1	7.4	30.6	17.7	4.5	30.1	10.5	-1.2	24.6

■ Class A Acc (Net of Charges)

■ FTSE customised North America Index

■ Sector: IA North America

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges 0.68%

The ongoing charges are based on last year's expenses for the year ending 30 April 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

The past performance is calculated in GBP.

The Fund and the share class were launched in February 2006.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

Warning: With effect from 31 October 2020 the Fund changed its performance target index to Solactive GBS North America customised Index +0.5%
