

MULTI-MANAGER DIVERSIFIED FUND

Class A Acc ISIN: GB00B1GJNX12
Fund Currency: GBP Share Class Currency: GBP

A unit trust, managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income over the long term.

Performance target: To outperform the IA Mixed Investment 0-35% Shares sector average, after the deduction of charges, over any 5 year period.

Investment policy

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property, commodities, private equity and hedge funds.

The Fund may also invest in other assets including investment trusts, cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the IA Mixed Investment 0-35% Shares sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target and limits the level of exposure the Fund may have to company shares. The investment manager has a high degree of freedom to choose individual investments for the Fund and to vary allocations between asset types within the constraints of the sector.

Strategy

The investment manager believes that asset allocation opportunities are generated by inefficient markets over short term periods and the Fund's asset mix is actively adjusted to reflect this and to reduce overall risk. The Fund will allocate across regional equities, the entire bond universe, alternative asset classes such as property and commodities and cash in weights cognisant of the benchmark index. Asset allocation views can be formed on the grounds of fundamental research, asset class valuations, market sentiment, investor positioning, news flow, technical factors and diversification. Investments are implemented primarily through actively managed funds, while passive (index tracking) instruments (primarily ETFs or derivatives) are used for short term tactical trades or for low cost implementation of pure macroeconomic views.

Distribution policy The Fund offers both accumulation units (units in which net income is retained within the price) and income units (units in which net income is paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch units in the Fund on any business day, as defined in the Fund Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

◆ Potentially lower reward			Potentially higher reward ◆			
◆ Lower risk			Higher risk ◆			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The unit class appears at 4 out of 7. Classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Default Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally

fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

Underlying Funds The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparties The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

Past performance

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges	1.89%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 31 May 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

Warning: 31 March 2012. The Fund changed its name and objective. The past performance shown before this change was therefore achieved under circumstances that no longer apply.

The past performance is calculated in GBP.

The Fund and the units were launched in May 1991.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

Practical information

Trustee: NatWest Trustee and Depository Services Limited.

To obtain more information: This Key Investor Information Document may not contain all the information you need.
