Fund Currency: GBP Share Class Currency: GBP

Janus Henderson
INVESTORS

A sub-fund of Janus Henderson Multi-Manager Investment OEIC, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income, with volatility lower than that of equity market volatility, over the long term.

Performance target: To outperform the 3 month GBP LIBOR Interest Rate by 4% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property and commodities. The Fund may also invest in other assets including shares (equities), bonds, cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the 3 month GBP LIBOR Interest Rate, as this forms the basis of the Fund's performance target. The investment manager has complete discretion to choose investments for the Fund.

Strategy

The investment manager follows a strategy that combines strategic asset allocation (based on long-term return, risk and correlation expectations of various asset classes), dynamic asset allocation (giving the strategy the flexibility to reflect the team's shorter term market views and to react quickly in times of market stress), and careful underlying fund and instrument selection. The investment process is underpinned by a robust, multi-faceted approach to risk management. The strategy results in a portfolio with exposure to a wide variety of asset classes, both traditional and alternative, in the expectation that investors will benefit from the significant diversification benefits multi-asset investing provides.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

The following risks apply to investments in the Fund. These could be triggered or made worse by unusual market conditions or unpredictable market events.

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Underlying Funds The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/ unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Past performance

Charges taken from the Fund over a year

Ongoing Charges	1.80%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 31 July 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in February 2011 and the share class was launched in April 2011.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the index.
