

UK ABSOLUTE RETURN FUND

Class A Acc ISIN: GB00B5KKCS68

Janus Henderson
INVESTORS

A sub-fund of Janus Henderson Investment Fund Series I, an OEIC managed by Henderson Investment Funds Limited.

Objectives and investment policy

Objective

The Fund aims to provide a positive absolute return in excess of the UK base interest rate, after the deduction of charges (but before the deduction of any performance fee) over the long term (rolling 3 year periods). The Fund aims to typically deliver an absolute (more than zero) return over a rolling 12-month period. An absolute return performance is not guaranteed over this specific, or any other, time period and consequently your capital is in fact at risk.

Investment policy

The Fund will typically invest at least 60% in:

- Shares of or derivatives of shares of UK companies (as defined in the prospectus). The Fund takes long positions on shares it believes are promising (meaning that the Fund will gain to the extent these share prices rise) and takes short positions in shares it believes are likely to decline in price (meaning the Fund will gain to the extent these share prices fall).

A substantial proportion of the Fund's assets may at any time consist of cash and near cash securities.

The Fund may also invest in:

- Up to 40% in shares or derivatives of shares of companies outside of the UK

In choosing investments, the investment manager looks for companies which have the potential to increase or decrease in price more over the long term than is currently reflected in market prices.

The Fund makes extensive use of investment techniques, particularly those that involve derivatives, to obtain both its long and short investment exposure.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

Fund currency GBP **Share class currency** GBP

Terms to understand

Collective Investment Schemes Funds that invest in shares and other securities from the UK and elsewhere.

Derivatives Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

Money market instruments A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

Shares / Equities Securities that represent fractional ownership in a company.

Short Position Taking a negative view on a security to profit from a fall in its price.

Volatility How sharply the Fund's share price has gone up and down over a period, generally several years.

You can buy, sell or switch shares in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.

The Fund offers accumulation shares (shares in which net income is retained within the price).

Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦			
♦ Lower risk			Higher risk ♦			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Transaction Costs (higher turnover strategy) The Fund involves a high level of buying and selling activity and as such will incur a higher level of transaction costs than a fund that trades less frequently. These transaction costs are in addition to the Fund's Ongoing Charges.

Non-UK Assets The Fund may invest up to 40% in shares or derivatives of shares of companies outside the UK.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge 5.00%

Exit Charge 0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges 1.69%

The ongoing charges are based on last year's expenses for the year ending 31 May 2018. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

Charges taken from the Fund under certain specific conditions

Performance fee 20.00%*

*20% of any returns that, subject to a High Water Mark, the Fund achieves above the Bank of England Base Rate. The actual amount charged in the Fund's last financial year amounted to 0.28%.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

Past performance

The past performance is calculated in GBP.

The Fund and the share class were launched in April 2009.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except entry charges.

Practical information

Depository: NatWest Trustee and Depository Services Limited.

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of shares in the Fund, or to obtain the annual/semi-annual report, please visit
