The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Janus Henderson
INVESTORS

Janus Henderson

Asset-Backed Securities Fund Class Y Acc ISIN: GB00BLKQL906

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Janus Henderson Fund Management UK Limited.

Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a return from a combination of income and some capital growth over the long term.

Performance target: To outperform SONIA by 1.5% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 70% of its assets in Asset-Backed Securities (ABS) including mortgage backed securities (MBS). The Fund invests only in investment grade securities (rated BBB- or higher by at least one independent credit rating agency) at the time of purchase. However, the Fund shall not hold more than 10% of its net asset value in such ABS, including MBS, that have been downgraded below investment grade after purchase.

The Fund may also hold other assets including other types of bonds and floating rate notes of any quality, from any issuer, Collective Investment Schemes (including those managed by Janus Henderson), certificates of deposit, bank term deposits and other money market investments (including cash funds), covered bonds, US agency mortgage-backed securities (that will not be deemed to form part of the minimum 70% ABS investment), Real Estate Investment Trusts (REITs) and other secured finance investments. The Fund may also hold securities issued by collective investment schemes (including those managed by Janus Henderson) for treasury management and/or to gain exposure to ABS, including MBS, aligned with its investment policy.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to SONIA, as this forms the basis of the Fund's performance target. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

Strategy

The Investment Manager invests in a diversified portfolio of asset-backed securities and other investments, with a focus on floating rate or low interest rate sensitivity. The Investment Manager will seek to generate the majority of return from income whilst maintaining a focus on investments that are expected to have strong fundamental credit resilience over the long term. As the Fund has no benchmark to follow, the Investment Manager has flexibility to utilise its broad expertise across securitisation markets to vary the portfolio mix based on relative value and the desired risk and return profile for the Fund.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	**2**	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 2 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Asset-Backed Securities Asset-Backed Securities (ABS) and other forms of securitised investments may be subject to greater credit / default, liquidity, interest rate and prepayment and extension risks, compared to other investments such as government or corporate issued bonds and this may negatively impact the realised return on investment in the securities.

Prepayment and Extension Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted.

Sustainability Approach The sustainability approach applied may exclude potential investments which do not meet certain criteria (e.g. non-financial criteria such as ESG screens). This may cause differences in performance compared to similar products that are permitted to invest in those investments.

Derivatives and Leverage Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Currency Hedging When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

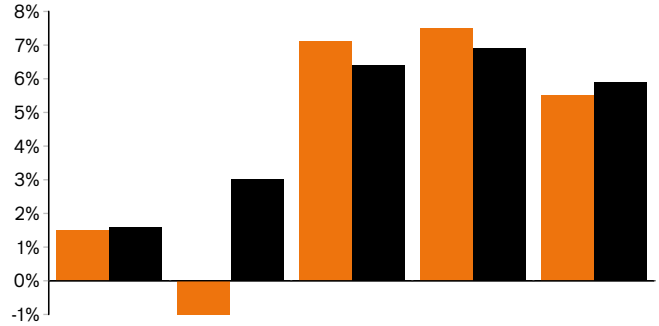

Ongoing Charges	0.35%

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2026. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance

Year	2021	2022	2023	2024	2025
	Performance (%)				
Class Y Acc (Net of Charges)	1.5	-1.0	7.1	7.5	5.5
SONIA +1.5% per annum	1.6	3.0	6.4	6.9	5.9

The past performance is calculated in GBP.

The Fund and the share class were launched in September 2020.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.

Practical information

Depositary: NatWest Trustee and Depositary Services Limited.

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of shares in the Fund or any additional information on the Fund, or to obtain the Company's prospectus or the annual/semi-annual report, please visit **www.janushenderson.com**. Documents are available free of charge in English and certain other languages.
