Janus Henderson

Institutional Short Duration Bond Fund Class Z Acc ISIN: GB00BYM2H885

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Janus Henderson Fund Management UK Limited.

Fund Currency: GBP Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a return primarily from income with the potential for some capital growth over the long term.

Performance target: To outperform SONIA by 0.25% per annum, before the deduction of charges, over any 3 year period.

Investment policy

The Fund invests in a global portfolio of short duration bonds, money market instruments and other fixed income and variable rate securities, issued by governments, companies or any other type of issuer, this may include but is not limited to asset backed and residential mortgage backed securities (ABS & RMBS).

The Fund may also invest in other assets including Collective Investment Schemes (including those managed by Janus Henderson) and cash.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk (specifically credit, currency and interest rate risks) or to manage the Fund more efficiently.

The Fund is actively managed with reference to SONIA, as this forms the basis of the Fund's performance target. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

Strategy

The Investment Manager aims to generate returns through the interest income from a diversified portfolio of primarily senior and short maturity investments with a focus on floating rate or low interest rate sensitivity. Investments are spread across highly rated corporate bonds, asset-backed securities, residential mortgage-backed securities and money market instruments. With no benchmark to follow the managers have the flexibility to vary the portfolio mix based on relative value and the desired risk and return.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

Risk and reward profile

Potentially lower reward ← → Potentially higher reward

Lower risk ← → Higher risk

1	2	**3**	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Asset-Backed Securities Asset-Backed Securities (ABS) and other forms of securitised investments may be subject to greater credit / default, liquidity, interest rate and prepayment and extension risks, compared to other investments such as government or corporate issued bonds and this may negatively impact the realised return on investment in the securities.

Prepayment and Extension Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted.

Derivatives Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Currency Hedging When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

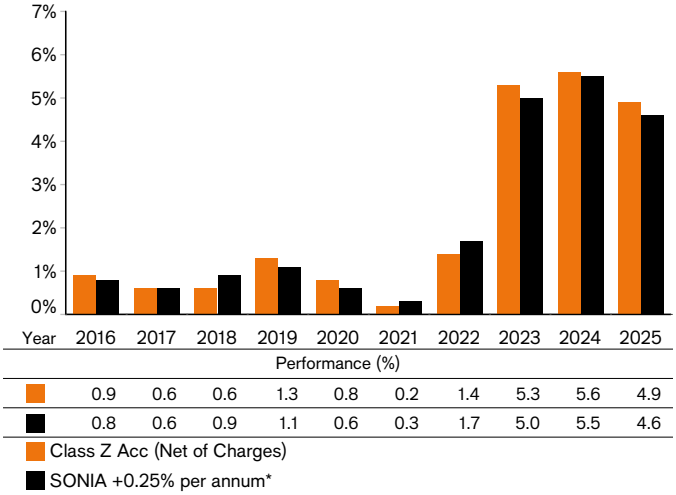

Ongoing Charges	0.04%

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2026. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Performance (%)										
Class Z Acc (Net of Charges)	0.9	0.6	0.6	1.3	0.8	0.2	1.4	5.3	5.6	4.9

*Warning: From 19 April 2021, the share class benchmark changed from 3 month GBP LIBOR Interest Rate to SONIA. Past performance before 19 April 2021 is shown for the previous share class benchmark.

The past performance is calculated in GBP.

The Fund and the share class were launched in November 2015.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.
