Fund aim

The Fund aims to achieve a positive absolute return in excess of the UK base interest rate, after charges (but before the deduction of any performance fees) over the long-term (rolling 3 year periods) regardless of market conditions. The Fund aims to provide an absolute (more than zero) return, typically over a 12-month period. An absolute return performance is not guaranteed over this specific, or any other, time period and particularly over the short term the Fund may experience periods of negative returns. Consequently your capital is in fact at risk. The Fund invests primarily in shares or derivatives of shares of companies with their registered office in or which do most of their business (directly or through subsidiaries) in Europe (including UK). The Fund takes long positions on shares it believes are promising (meaning that the Fund will gain to the extent these share prices may rise) and takes short positions in shares it believes are likely to decline in price (meaning the Fund will gain to the extent these share prices fall). At any time, all or a substantial proportion of the assets may consist of cash and near cash securities.

The Fund makes extensive use of investment techniques, particularly those that involve derivatives, to obtain both its long and short investment exposure.

Additional information

Please note that as of 30 April 2018, Robert Schramm-Fuchs also manages the fund.

Please refer to the Janus Henderson website for a glossary of terms used in this document.

Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk.

What are the risks specific to this fund?

- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.
- The Fund involves a high level of buying and selling activity and as such will incur a higher level of transaction costs than a fund that trades less frequently. These transaction costs are in addition to the Fund's Ongoing Charges.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

Important information

Fund size at 12pm on last business day of month. † Investors should refer to the prospectus for full details on performance fee where a performance fee is applicable. * Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. + Index: The UK Base Interest Rate is the interest rate set by the Bank of England. It is the performance target of the Fund and it provides a useful comparison against which the Fund's performance can be assessed over time. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Unless otherwise indicated all figures sourced from Morningstar, Datastream, BNP Paribas and Janus Henderson Investors.
