Fund aim

The Fund aims to achieve a return through capital growth and income, that is above the average return expected from an investment in shares of smaller UK and Irish companies. The Fund invests in shares of companies with their registered office in the UK or Ireland or which do most of their business (directly or through subsidiaries) in the UK or Ireland. The Fund may also invest in money market instruments and bank deposits. The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Additional information

Please be advised that with effect from 1 November 2018, the Janus Henderson UK & Irish Smaller Companies Fund has been managed in-house by Neil Hermon. Prior to this change the Fund had been managed externally by Lombard Odier. On 3 March 2014 the Fund changed its benchmark from FTSE Small Cap ex Investment Trust Index to the Numis + AIM (excluding investment companies and companies with a market capitalisation of more than £1bn). The benchmark shown is the composite of the two.

Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk.

What are the risks specific to this fund?

- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

Important information

Fund size at 12pm on last business day of month. FTSE Small Cap ex Investment Trust Index redistributed and FTSE® used under licence from FTSE. FTSE and its licensors Financial Times Limited and London Stock Exchange plc own all rights therein and disclaim liability for errors/omissions. * Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. + Index: The Numis Sub-£1bn ex Investment Companies Index is a measure of the combined performance of smaller companies (the bottom 10%) listed on the London Stock Exchange excluding investment companies and companies with a market capitalisation greater than £1bn. It provides a useful comparison against which the Fund's performance can be assessed over time. ++ Peer group benchmark: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The Fund's ranking within the sector (as calculated by a number of data providers) can be a useful performance comparison against other funds with similar aims. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%.
