MULTI-MANAGER GLOBAL SELECT FUND

E Acc ISIN GB00BJ0LG858

Investment objective

The Fund aims to provide capital growth over the long term. Performance target: to outperform the MSCI All Country World Index, after the deduction of charges, over any 5 year period.

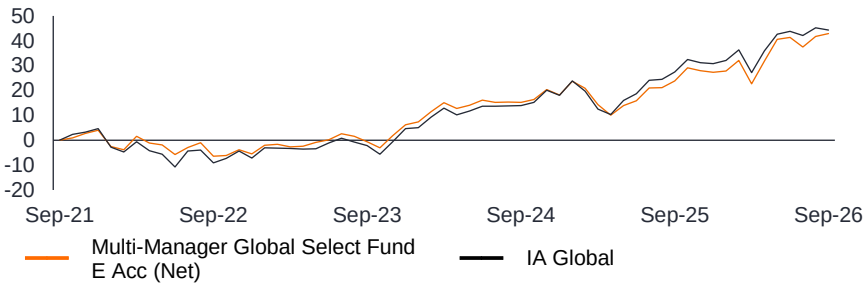

For the fund's investment policy, refer to the Additional fund information on page 3.
Past performance does not predict future returns.

Fees & charges (%)

Annual management charge (AMC)	0.75
Estimated ongoing charge (OCF)	1.30

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. From November 2015 the fund managers have recently opted to extend the use of open ended funds within the portfolio from the previous level of around 50% to around 70%. This remains in line with the fund's Investment Policy and will not alter its risk profile. Whilst there will be a small increase in the ongoing charges as a result of this we believe that the benefits (greater diversification, investment choice and liquidity) outweigh the small increase in cost. The fund can invest in the shares of smaller companies which may be less liquid. This is likely to carry a higher degree of risk than investing in the shares of larger companies, and may be more volatile over short periods. The fund may invest in shares in emerging stock markets, which can be more volatile than those in more developed stock markets. From 11 March 2022, the Fund changed its Investment Policy. The past performance shown before this change was therefore achieved under circumstances that no longer apply. From 31 March 2025, the Fund's performance target changed from the IA Global sector to the MSCI All Country World Index, the Investment policy and benchmark also changed. The Sector remains as an additional useful comparator. Fund size at 12pm on last business day of month. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.
The MSCI All Countries World Index is a measure of the combined performance of large and medium sized companies from both developed and emerging stock markets around the world. It forms the basis of the Fund's performance target and provides a useful comparison against which the Fund's performance can be assessed over time.
The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The Fund's ranking within the sector (as calculated by a number of data providers) can be a useful performance comparison against other funds with similar aims.

Investment policy

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure, with at least 80% of the Fund's exposure to shares (equities) of companies. To a lesser extent, the Fund may also hold other asset classes including bonds issued by companies and governments, and alternative assets such as property, commodities, private equity and hedge funds. The Fund may also invest directly in other assets including developed market government bonds, investment trusts, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the MSCI All Country World Index, as this forms the basis of the Fund's performance target. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark. As an additional means of assessing the performance of the Fund, the IA Global sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Investment strategy

The Investment Manager believes that asset allocation opportunities are generated by inefficient markets over short term periods and the Fund's asset mix is actively adjusted to reflect this and to reduce overall risk. The Fund will allocate primarily across regional equities in weights cognisant of the benchmark index. Asset allocation views can be formed on the grounds of fundamental research, asset class valuations, market sentiment, investor positioning, news flow, technical factors and diversification. Investments are implemented primarily through actively managed funds, while passive (index tracking) instruments (primarily ETFs or derivatives) are used for short term tactical trades or for low cost implementation of pure macroeconomic views. The Fund may also hold up to 20% in developed market government bonds.

Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. The Fund invests in other funds (including exchange-traded funds and investment trusts/companies). This may introduce more risky assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

Source for fund ratings/awards

Where available, overall Morningstar Rating™ is shown for share classes achieving a rating of 4 or 5 stars.

Glossary

Historic Yield
The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

Standard deviation
A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.

Tracking error
This measures how far a portfolio's actual performance differs from its benchmark index. The lower the number, the more closely it resembles the index.
