Fund aim

The Fund aims to achieve a long-term return, in excess of the long-term return that is typically achieved from European smaller companies equity markets, by investing at any given time at least two-thirds of its net assets in:

- smaller companies having their registered office in Europe (including the United Kingdom),
- smaller companies that do not have their registered office in Europe but either (i) carry out a predominant proportion of their business activity in Europe (including the United Kingdom), or (ii) are holding companies which predominantly own companies with registered offices in Europe (including the United Kingdom).

The return will be a combination of capital and income returns.

In this context the term "European smaller companies" means companies whose market capitalisation, at the time of purchase by the Investment Manager, does not exceed Euro 5 billion. This capitalisation figure may be adjusted from time to time, depending on market conditions.

What are the risks specific to this fund?

- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.
- Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
