Fund aim

The Fund aims to provide capital growth by investing at least 2/3rds of its total assets (after deduction of cash) in equity or equity related securities, or derivatives, of companies located or which do most of their business in Europe (including the UK). The Fund takes long positions on shares it believes are promising (meaning that the Fund will gain to the extent these share prices rise) and takes short positions in shares it believes are likely to decline in price (meaning the Fund will gain to the extent these share prices fall). The Fund makes extensive use of investment techniques, particularly those that involve derivatives, to obtain both its long and short investment exposure.

What are the risks specific to this fund?

- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
