Fund aim

The investment objective of the Global Technology Fund is to seek long-term capital appreciation by investing in a globally diversified portfolio of technology-related companies. The Fund aims to take advantage of market trends internationally. The Fund takes a geographically diversified approach and operates within broad asset allocation ranges. There are no specified limits on the amounts that the Fund can or must invest in any geographical region or single country.

Additional information

The Benchmark administrator, MSCI Limited, restructured the Benchmark on 30 November 2018, meaning the constituents of the Benchmark will change with the reclassification of certain companies in it to another benchmark. As a result, the Management Company and the Investment Manager have jointly concluded that the Benchmark will no longer be appropriate for the calculation of the Performance Fee going forward and may be potentially disadvantageous to Shareholders. Accordingly, in advance of being able to identify a more appropriate benchmark for the Performance Fee calculation, the Management Company and the Investment Manager will waive any Performance Fees that may accrue and be payable for the Share Classes as of 1 December 2018 until further notice. Please note that with effect from 03 April 2018, Stuart O'Gorman no longer managed this fund. In accordance to the UCITS Directive the fund will not invest more than 10% of its assets in shares of a single company.

Please note that as of 1 August 2017, Graeme Clark and Richard Clode also managed this fund.

This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk. To obtain our prospectus and any additional information please visit our website on: www.janus Henderson.com.

What are the risks specific to this fund?

- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund's value may fall where it has concentrated exposure to a particular industry that is heavily affected by an adverse event.
- Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.
