Fund aim

The Fund aims to provide capital growth by investing at least 80% of its net assets in equities or equity-related securities of companies with either their registered office in China or Hong Kong, or which do most of their business in China or Hong Kong. The Fund takes long positions on shares it believes are promising (meaning that the Fund will gain to the extent these share prices rise) and takes short positions in shares it believes are likely to decline in price (meaning the Fund will gain to the extent these share prices fall). The Fund will have significantly greater exposure to long positions and is therefore likely to demonstrate a high correlation to Chinese equity markets in general.

The Fund may use derivatives to achieve the Fund's investment objective, to reduce risk or to manage the Fund more efficiently.

Additional information

What are the risks specific to this fund?

- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.
- Emerging markets are less established and more prone to political events than developed markets. This can mean both higher volatility and a greater risk of loss to the Fund than investing in more developed markets.
- Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

Important information

The exchanges table illustrates the financial exchanges where shares are purchased for the Fund. Shares in Chinese companies are often traded on exchanges outside of China even though they may relate to Chinese based companies. Many Chinese companies are listed on the Hong Kong exchange as this is the primary source of foreign capital. An A-share is a domestic Chinese share class. A B-share is a domestic share class that is traded in a currency other than the Chinese currency, such as the Hong Kong Dollar or US Dollar. An ADR is a stock listed in US stock markets to facilitate trading in shares of non-US companies. † Investors should refer to the prospectus for full details on performance fee where a performance fee is applicable. * Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the midmarket share price, at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%.
