JANUS HENDERSON HORIZON FUND - DISCOVERING NEW ALPHA FUND

A2 USD ISIN LU3154197191

Investment objective

The Fund aims to provide capital growth over the long term. The Fund invests at least 80% of its net assets in equities or equity-related instruments of companies worldwide, including up to 20% of its net assets in emerging markets, whose products and services are considered by the Investment Manager to contribute positively to addressing global challenges including population growth, ageing population, resource constraints and climate change. The Fund may invest in companies of any size, in any country and in any industry, but may have a bias towards smaller capitalisation companies.

Performance (%)

Due to current regulations we are only permitted to show performance if the share class is more than one year old.

The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.

Codes

ISIN	LU3154197191
Bloomberg	JHDNA2U LX
Cusip	L5620A707
SEDOL	BVMJT59

Fees & charges (%)

Maximum initial sales charge	5.00
Annual management charge (AMC)	1.20
Estimated total expense ratio (TER)	1.87

TER data is not available for newly launched share classes. Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com. Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Information relating to other currencies and fee structure can be found in the fund prospectus. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date. Performance with sales charge source: Janus Henderson. Investors, calculated on a NAV to NAV basis, net of 5.00% initial charge, with gross income reinvested at NAV price. Note: The performance calculation is based on a maximum initial sales charge of 5.00%. The actual initial sales charge paid by the unitholder may be different based on the discount, if any, applied by distributors. As such, the performance return may differ based on the discount, if any, applied by distributors. Refer to the prospectus for more details on shares classes offered. All ongoing charges stated are as per latest published report and accounts. Where the ongoing charges exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the Fund's outperformance target (before the deduction of charges) has been achieved. For funds which charge performance fees, investors should note that the total expense ratio includes the performance fees crystallised for the preceding performance period.

Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. This fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.

Glossary

Active share
This measures how much a portfolio's holdings differ from its benchmark index. For example, a portfolio with an active share of 60% indicates that 60% of its holdings differ from its benchmark, while the remaining 40% mirror the benchmark.

Historic Yield
The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

Price-to-book (P/B) ratio
A financial ratio used to value a company's shares. It is calculated by dividing a company's market value (share price) by the book value of its equity (value of the company's assets on its balance sheet). A P/B value <1 can indicate a potentially undervalued company or a declining business. The higher the P/B ratio, the higher the premium the market is willing to pay for the company above the book (balance sheet) value of its assets.

Price-to-earnings (P/E) ratio
A popular ratio used to value a company's shares, compared to other stocks, or a benchmark index. It is calculated by dividing the current share price by its earnings per share.

Weighted average market cap
The average market capitalisation of a holding, weighted by the size of that position in a portfolio or index.

Janus Henderson
INVESTORS

This product integrates ESG but does not pursue a sustainable investment strategy or have a sustainable investment objective or otherwise take ESG factors into account in a binding manner. ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights in a non-binding manner alongside traditional measures into the investment decision process to improve long-term financial outcomes of portfolios. ESG related research is one of many factors considered within the investment process and in this material we seek to show why it is financially relevant. In preparing this document, Janus Henderson Investors has reasonable belief to rely upon the accuracy and completeness of all information available from public sources. **Past performance does not predict future returns. Investing involves risk, including the possible loss of principal and fluctuation of value.** The Fund may employ investment techniques and instruments for investment purposes, such as trading in futures, options and swaps and other financial derivative instruments. This document has been prepared by Janus Henderson Investors (Singapore) Limited, the Singapore

Representative of the Fund. The Fund is distributed by authorised distributors. The prospectus and Product Highlights Sheet ("PHS") of the Fund are available and may be obtained from the Singapore Representative's office and the authorized distributors' offices. Investors should read the prospectus and PHS before deciding whether to invest in the shares of the Fund. Investors are warned that they should only make their investments based on the most recent offering documents which contains information about fees, expenses and risks, which is available from appointed intermediaries, and which should be read carefully. An investment in the Fund may not be suitable for all investors and is not available to all investors in all jurisdictions; it is not available to US persons. The rate of return may vary and the principal value of an investment will fluctuate due to market and foreign exchange movements. Shares, if redeemed, may be worth more or less than their original cost. Investors are advised to consult your intermediary who will give you advice on the product suitability and help you determine how your investment would be consistent with your own investment objectives. The investment decisions are yours and an investment in the Fund may not be suitable for everyone. If in doubt, please contact your intermediary for clarification.
