Objective and investment policy

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE World Europe ex UK Index, after the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, in any industry, in Europe (excluding UK). Companies will be located, listed or do most of their business in this region. The Fund will normally have a strong bias towards medium sized companies.

The Fund is actively managed with reference to the FTSE World Europe ex UK Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
