### Objective and investment policy

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE World Europe ex UK Index, after the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, in any industry, in Europe (excluding UK). Companies will be located, listed or do most of their business in this region. The Fund will normally have a strong bias towards medium sized companies.

The Fund is actively managed with reference to the FTSE World Europe ex UK Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

## What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

## Important information

**The investments underlying this financial product (referred to as the Fund) do not take into account the EU criteria for environmentally sustainable economic activities. While the analysis of ESG factors is an integral component across the Investment Manager's investment capabilities, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the Fund. The Investment Manager does not consider the adverse impacts of investment decisions on sustainability factors as set out under SFDR with respect to the Fund because it is not classified under either Article 9 or Article 8 of Regulation (EU) 2019/2088.** All ongoing charges stated are as per latest published report and accounts. \* Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the midmarket share price, at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. For hedged share classes the appropriate index is the hedged version of the mandated benchmark. Only share class returns are displayed as we do not currently subscribe to this index. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%.
