

JANUS HENDERSON HORIZON FUND – GLOBAL SMALLER COMPANIES FUND

A2 USD ISIN LU1983261782

At a glance

Performance

The Fund returned –3.87%, the Index returned –4.14% and the Sector returned –3.91%.

Contributors/detractors

Stock selection was the main contributor to fund performance.

Outlook

We believe global small-cap companies remain well positioned, provided economies avoid a significant and prolonged monetary policy tightening cycle.

Investment environment

- September proved to be a more challenging month for risk assets, with global equity markets adopting a more cautious tone.
- Investor sentiment was largely influenced by continued tensions in the Middle East, alongside a meaningful rise in government bond yields (and a corresponding fall in prices) as markets reassessed the outlook for interest rates and the possibility of further central bank monetary policy tightening over the coming year.
- These developments weighed on risk appetite and prompted a shift away from some of the stronger-performing areas of the market.
- Against this backdrop, global small-cap equities underperformed their larger-cap counterparts. US small caps were particularly weak, lagging international markets.
- While the near-term backdrop has become more volatile, economic activity remains broadly supportive and has continued to provide a constructive foundation for corporate earnings.

Portfolio review

The portfolio delivered broadly flat returns relative to the benchmark during September, with performance driven

primarily by stock-specific developments. One of the largest positive contributors came from merger and acquisition (M&A) activity. Japanese real estate company Leopalace21 received a takeover approach at a premium of approximately 45%, generating strong returns for the portfolio. We also benefited from the announced merger between Qorvo and Skyworks, which resulted in a positive re-rating of our holding in Qorvo. Elsewhere, continued investment in data centre infrastructure supported strong performance from both Comfort Systems and Sterling Infrastructure, two holdings that we believe remain well positioned to benefit from the ongoing build-out of artificial intelligence (AI)-related infrastructure. Halozyne Therapeutics was another notable contributor. The company continued to expand the adoption of its ENHANZE drug delivery technology, which enables certain therapies to be administered via subcutaneous injection rather than intravenous infusion. This improves convenience for both patients and healthcare providers and is leading to new royalty opportunities as additional pharmaceutical companies adopt the platform.

On the negative side, FlatexDEGIRO detracted following an unexpected management change, which heightened investor concerns around governance. While we are monitoring developments carefully, we continue to assess the implications for the long-term investment case. We also had no position in Moderna, whose shares continued their strong rally following positive developments relating to its

skin cancer programme. Given its market capitalisation, it is expected to leave our index at the next review. We also saw weaker performance from Hamilton Lane, as concerns surrounding private asset markets continued to weigh on sentiment. Frontdoor was another detractor, despite operational performance remaining solid, with investor concerns focused primarily on the challenges facing the US housing market in a higher interest rate environment.

Portfolio activity during the month was largely driven by our quarterly review process, resulting in several new additions. We initiated a position in Manhattan Associates, a provider of cloud-native supply chain and e-commerce software. The company benefits from strong customer retention rates and a competitive position within mission-critical software markets. We also added Koninklijke BAM Groep, which operates in the European construction market, and initiated a position in Cactus, a specialist supplier to the energy industry whose wellhead technologies have a strong reputation for reliability and safety. Within consumer discretionary, we established a position in Lovisa, the vertically integrated fashion jewellery retailer. We believe the company's capital-light business model, international expansion opportunities and attractive returns profile create the potential for long-term value creation. We also added several financial companies,

including Bendigo and Adelaide Bank, Bank of East Asia and Esquire Financial. Esquire Financial is a specialist provider of banking services to the legal industry in the US and has developed a differentiated niche position within its market.

Manager outlook

Investor sentiment towards small-cap equities has weakened as bond yields have risen rapidly. While we recognise this concern, we believe the asset class remains well positioned, provided economies avoid a significant and prolonged monetary policy tightening cycle. Valuations across global small-cap markets appear attractive to us, both relative to history and compared with larger-cap equities. In addition, economic activity continues to appear resilient. Purchasing Managers' Indices (PMIs) in the US remain consistent with economic expansion, while manufacturing activity in Europe has also shown signs of improvement, despite an uncertain political backdrop. In this environment, we remain focused on identifying high-quality businesses with durable competitive advantages, strong returns on capital and attractive long-term opportunities.

The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.**

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations.

Performance fees may be charged before the Fund's outperformance target is reached.

Performance fees are charged separately as a way of rewarding the investment manager for superior returns or for outperforming specified targets. A Performance Fee is accrued where the NAV outperforms the relevant Hurdle NAV (subject to a High Water Mark). For further explanation of the performance fee calculation methodology please see the relevant prospectus, available at www.janushenderson.com.

Past performance does not predict future returns.

Asset class	Equities
Domicile	Luxembourg
Structure	SICAV
Base currency	USD
Index	MSCI World Small Cap Index
Morningstar sector	Global Small/Mid-Cap Equity
SFDR category	Article 8

In accordance with the Sustainable Finance Disclosure Regulation, the Fund is classified as Article 8 and promotes, among other characteristics, environmental and/or social characteristics, and invests in companies with good governance practices.

Investment objective

The Fund aims to provide capital growth over the long term. The Fund invests at least 80% of its assets in shares (equities) and equity-related securities of smaller companies, in any industry, in any country.

Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
