GLOBAL MULTI-STRATEGY FUND

A2 HUSD ISIN LU2114516961

Investment objective

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period and, particularly over the shorter term, the Fund may experience periods of negative returns. Consequently, your capital is at risk. Performance target: To outperform the Euro Short Term Rate by 7% per annum, before the deduction of charges, over any 3 year period.

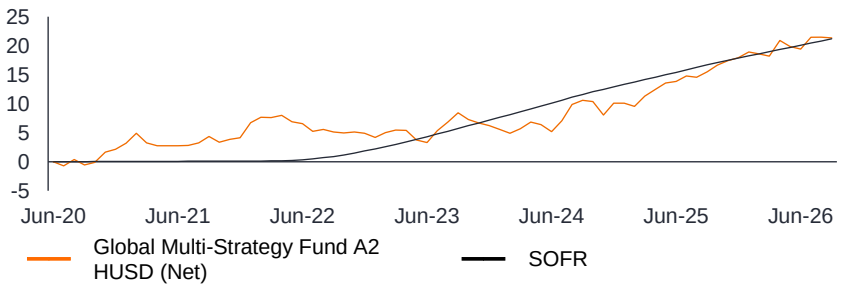

For the fund's investment policy, refer to the Additional fund information on page 3.
Past performance does not predict future returns.

SEDOL	BKT6ZZ8
WKN	A2P66K
Valoren	55227622

Fees & charges (%)

Annual management charge (AMC)	1.50
Performance fee description	20% of any returns that subject to a high water mark the share class achieves above the Secured Overnight Financing Rate
Ongoing charge (OCF)	1.70

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Performance fees may be charged before the Fund's outperformance target is reached.

Performance fees are charged separately as a way of rewarding the investment manager for superior returns or for outperforming specified targets. A Performance Fee is accrued where the NAV outperforms the relevant Hurdle NAV (subject to a High Water Mark). For further explanation of the performance fee calculation methodology please see the relevant prospectus, available at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target wording within the objective. The performance data does not take account of the initial charge and Janus Henderson does not currently levy a redemption charge. Ex-Ante risk is a one year forward looking volatility forecast. Volatility is measured through standard deviation. Actual results may vary, and the information should not be considered or relied upon as a performance guarantee. Any risk management process discussed includes an effort to monitor and manage risk which should not be confused with and does not imply low risk or the ability to control certain risk factors. From 30 April 2025, the benchmark changed from the Euro Main Refinancing Rate to Euro Short Term Rate (€STR), the Fund's investment policy, performance target and objective also changed. Past performance shown before 30 April 2025 was achieved under circumstances that no longer apply. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. The performance fee described on page 2 will be applicable if the fund achieves a return in excess of the High Water Mark and the Secured Overnight Financing Rate. Investors should refer to the prospectus for full details on performance fee where a performance fee is applicable. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Ongoing charge represents the ongoing costs to the fund, which includes the AMC and other charges for services such as keeping a register of investors, calculating the price of the fund's units or shares and keeping the fund's assets safe. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. The ongoing charge is calculated using the PRIIP methodology. The PRIIP methodology differs to the UCITS ongoing charge methodology, as the PRIIP methodology captures additional recurring charges, including but not limited to: Interest paid on borrowing (e.g. bank interest); Any fees incurred in relation to stock-lending activity (i.e. the fee paid to the lending agent); Any costs associated with holding closed-ended vehicles. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Investment policy

The Fund invests in a global portfolio of assets including shares of companies, investment grade and non-investment grade bonds issued by governments and companies (including convertible bonds, contingent convertible bonds and distressed securities), currencies, and makes extensive use of derivatives (complex financial instruments), including total return swaps, to take both 'long' and 'short' positions in companies and bonds that the Investment Manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario. The Fund may invest up to 20% of its net assets in contingent convertible bonds. The Fund may invest up to 10% of its net assets in special purpose acquisition companies and 10% in distressed debt securities. The Fund will hold a substantial proportion of its assets in cash and money market instruments as a result of holding derivatives or for asset allocation purposes. The Fund may also take long or short exposures to other asset classes such as commodities and may hold other funds (such as collective investment schemes and exchange traded funds). Allocations across asset classes will be made at the Investment Manager's discretion and the Fund need not be invested in all asset classes at any one time. It follows an unconstrained investment approach, with no regional or sector constraints. The Fund is actively managed and makes reference to the Euro Short Term Rate, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison and for calculating performance fees. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

Investment strategy

The Investment Manager adopts a multi-strategy approach, utilising a diverse range of investment styles, techniques, assets, company sizes, time horizons and markets with the aim of providing a positive return. Long positions may be held through a combination of direct investment and/or derivative instruments, whilst the short positions are achieved entirely through derivative instruments. The use of derivatives is extensive and forms an important part of the investment strategy.

Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall. High yielding (non-investment grade) bonds are more speculative and more sensitive to adverse changes in market conditions. When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment. CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares/units of the issuer or to be partly or wholly written off. SPACs are shell companies set up to acquire businesses. They are complex and often lack the transparency of established companies, and therefore present greater risks to investors. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. The Fund involves a high level of buying and selling activity and as such will incur a higher level of transaction costs than a fund that trades less frequently. These transaction costs are in addition to the Fund's ongoing charges. The Fund's exposure to commodities may be subject to rapid and substantial price movements resulting in high volatility. Developments affecting commodities instruments, such as changes in supply and demand, government programs and policies, political events and changes in interest rates may have an impact on the Fund. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

Source for fund ratings/awards

Where available, overall Morningstar Rating™ is shown for share classes achieving a rating of 4 or 5 stars.

Glossary

High yield bond
A bond which has a lower credit rating below an investment grade bond. It is sometimes known as a sub-investment grade bond. These bonds usually carry a higher risk of the issuer defaulting on their payments, so they are typically issued with a higher coupon to compensate for the additional risk.

Historic Yield
The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

Sharpe ratio
This measures a portfolio's risk-adjusted performance. A high Sharpe ratio indicates a better risk-adjusted return. The ratio is designed to measure how far a portfolio's return can be attributed to fund manager skill as opposed to excessive risk taking.

Standard deviation
A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.

Swaps
A derivative contract between two parties where pre-determined cash flows of two financial instruments are exchanged. Swaps can help to hedge risk and minimise uncertainty; for example currency swaps can be used to minimise foreign currency exposure.

Volatility
The rate and extent at which the price of a portfolio, security or index, moves up and down. If the price swings up and down with large movements, it has high volatility. If the price moves more slowly and to a lesser extent, it has lower volatility. Higher volatility means the higher the risk of the investment.

Janus Henderson
INVESTORS

This product integrates ESG but does not pursue a sustainable investment strategy or have a sustainable investment objective or otherwise take ESG factors into account in a binding manner. ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights in a non-binding manner alongside traditional measures into the investment decision process to improve long-term financial outcomes of portfolios. ESG related research is one of many factors considered within the investment process and in this material we seek to show why it is financially relevant. **Solely for US Financial Professionals servicing non-US persons. Not for onward distribution.** Any investment application will be made solely on the basis of the information contained in the Fund's prospectus (including all relevant covering documents), which will contain investment restrictions. This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions. A copy of the Fund's prospectus and key information document can be obtained from Janus Henderson Investors UK Limited in its capacity as Investment Manager and Distributor as well as Janus Henderson Investors Europe S.A.Nothing in this document is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially. For sustainability related aspects please access Janushenderson.com. We may record telephone calls for our mutual protection, to improve customer service and for regulatory record keeping purposes. With effect from 1 January 2023, the Key Investor Information document (KIID) changed to the Key Information Document (KID), except in the UK where investors should continue to refer to the KIID. The Janus Henderson Fund (the "Fund") is a Luxembourg SICAV incorporated on 26 September 2000, managed by Janus Henderson Investors Europe S.A. Shares of the Janus Henderson Fund may not be directly or indirectly offered or sold to U.S. Persons and may not be offered or sold in any jurisdiction where such offering or sale is prohibited. Please contact your Janus Henderson Investors representative if you are unsure of the availability of the Funds in your client's jurisdiction.
