HORIZON STRATEGIC BOND FUND

H2 USD ISIN LU2401547067

Investment objective

The Fund aims to provide a return, from a combination of income and capital growth, over the long term (5 years or more).

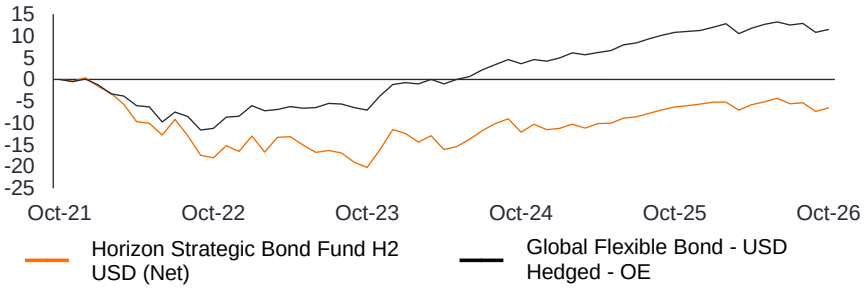

For the fund's investment policy, refer to the Additional fund information on page 3.
Past performance does not predict future returns.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **Past performance does not predict future returns.** Performance/performance target related data will display only where relevant to the share class inception date and annualised target time period. **The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.** Source for target returns (where applicable) - Janus Henderson Investors. The H2 USD share class was launched on 09 November 2021. Performance prior to that date is past performance based on the A2 USD share class of the same fund, which has a different fee structure.

Fund details

Inception date	26 July 2017
Total net assets	78.48m
Asset class	Fixed Income
Domicile	Luxembourg
Structure	SICAV
Base currency	USD
Index	Not Applicable
Morningstar sector	Global Flexible Bond - USD Hedged
SFDR category	Article 8

In accordance with the Sustainable Finance Disclosure Regulation, the Fund is classified as Article 8 and promotes, among other characteristics, environmental and/or social characteristics, and invests in companies with good governance practices.

Share class information

Inception date	09 November 2021
Distribution type	Accumulation Gross
Distribution yield	5.70%
Underlying yield	5.40%
Currency	USD
Minimum initial investment	7,500

The Distribution and Underlying Yields are based on a snapshot of the portfolio on that day. The yield does not include any preliminary charge and investors may be subject to tax on distributions.

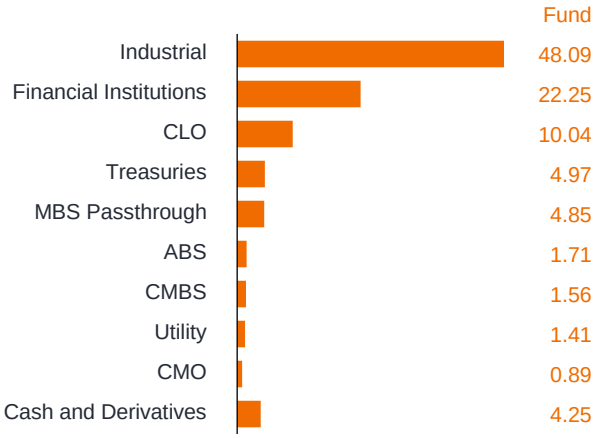

Portfolio management

John Lloyd	Manager since 2026
Helen Anthony, CFA	Manager since 2026
Oliver Bardot, CFA	Manager since 2023
Jenna Barnard, CFA	Manager since 2017
Addison Maier	Manager since 2026
Nicholas Ware	Manager since 2024

Characteristics

Number of holdings: Debt issues	223
Duration (years)	4.83
Weighted average life (years)	7.70
Yield to worst (%)	6.41

Fees & charges (%)

Annual management charge (AMC)	0.38
Ongoing charge (OCF)	0.79

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. The performance data does not take account of the initial charge and Janus Henderson does not currently levy a redemption charge. From 16 March 2023, the Fund changed its investment policy. Past performance shown before this date was achieved under circumstances that no longer apply. As of 1 August 2026, John Lloyd, Helen Anthony, CFA & Addison Maier have been appointed as co-managers of this fund. 100% of the Annual Management Charge is taken from capital. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Investment policy

The Fund invests in bonds of any quality, including high yield (non-investment grade) bonds, asset-backed and mortgage-backed securities and distressed debt, issued by governments, companies or any other type of issuer, in any country. The Fund may invest up to 50% in total return swaps. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements. The Fund may also invest in other assets including perpetual bonds, convertible bonds, contingent convertible bonds (CoCos), company shares (equities), preference shares, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed without reference to a benchmark. The Investment Manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

Investment strategy

The Fund follows a flexible strategy to construct a diverse portfolio of investments from across the spectrum of fixed income assets. The Investment Manager actively varies the allocation to different types of bonds to suit the prevailing economic environment, based on careful macroeconomic research and credit analysis. At times in the market cycle, the fund will be expected to have higher interest rate sensitivity, which may result in significant underperformance or outperformance, particularly when government bond yields move more quickly or to a greater extent than anticipated. The Investment Manager adopts this approach as it is believed this can be beneficial for long-term performance.

Fund specific risks

An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall. When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment. When interest rates rise (or fall), the prices of different bonds will be affected differently. In particular, bond prices generally fall when interest rates rise or are expected to rise. This is especially true for bonds with a higher sensitivity to interest rate changes. A material portion of the fund may be invested in such bonds (or bond derivatives), so rising interest rates may have a negative impact on fund returns. While high yield (non-investment grade) bonds generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions. Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted. CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares/units of the issuer or to be partly or wholly written off. High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio. Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall. High yielding (non-investment grade) bonds are more speculative and more sensitive to adverse changes in market conditions. Some or all of the ongoing charges and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. Mortgage-backed securities (MBS), non-agency mortgage-related securities, credit risk transfer securities, and TBA commitments involve specific risks. These include borrowers failing to make payments (credit risk), changes in interest rates affecting repayment timing, and market conditions that may make selling these investments harder. Investments in Collateralised Loan Obligations (CLOs), are investments backed by pools of company loans, which may be affected if borrowers fail to repay their loans, interest rates change, or market conditions worsen. CLOs can be difficult to sell during periods of market stress, which may reduce income and increase losses. Credit ratings are opinions only and do not guarantee performance or protect against loss. Even highly rated CLOs can fall in value. Returns also depend on the decisions of the CLO manager. CLOs have their own operating costs, which are borne indirectly by investors in addition to the Fund's fees. The sustainability approach applied may exclude potential investments which do not meet certain criteria (e.g. non-financial criteria such as ESG screens). This may cause differences in performance compared to similar products that are permitted to invest in those investments.

Where available, overall Morningstar Rating™ is shown for share classes achieving a rating of 4 or 5 stars.

Glossary

Asset-backed securities (ABS)
A financial security which is 'backed' with assets such as loans, credit card debts or leases. They give investors the opportunity to invest in a wide variety of income-generating assets.

Discount
When the market price of a security is thought to be less than its underlying value, it is said to be 'trading at a discount'. Within investment trusts, this is the amount by which the price per share of an investment trust is lower than the value of its underlying net asset value. The opposite of trading at a premium.

Distribution Yield
The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market share price of the fund at the date shown.

Duration
Duration can measure how long it takes (in years) for an investor to be repaid a bond's price by the bond's total cash flows. Duration can also measure the sensitivity of a bond's or fixed-income portfolio's price to changes in interest rates. The longer a bond's duration, the higher its sensitivity to changes in interest rates, and vice versa. 'Going short duration' refers to reducing the average duration of a portfolio, while 'going long duration' refers to extending a portfolio's average duration.

Future
A contract between two parties to buy or sell a tradable asset, such as shares, bonds, commodities or currencies, at a specified future date at a price agreed today. A future is a form of derivative.

High yield bond
A bond which has a lower credit rating below an investment grade bond. It is sometimes known as a sub-investment grade bond. These bonds usually carry a higher risk of the issuer defaulting on their payments, so they are typically issued with a higher coupon to compensate for the additional risk.

Mortgage-backed security (MBS)
A security which is secured (or 'backed') by a collection of mortgages. Investors receive periodic payments derived from the underlying mortgages, similar to coupons. Similar to an asset-backed security.

Option
A derivative instrument where one party pays/receives the total return of the underlying asset or market index, in exchange for payments typically linked to LIBOR.

Swaps
A derivative contract between two parties where pre-determined cash flows of two financial instruments are exchanged. Swaps can help to hedge risk and minimise uncertainty; for example currency swaps can be used to minimise foreign currency exposure.

Underlying Yield
The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund at the date shown.

Weighted Average Life (WAL)
The average time taken (in years) for the principal to be repaid for securitised assets, or the probable time to maturity for non-securitised assets. Securitised assets, also known as 'asset backed' securities, represent a pool of other interest bearing assets such as loans and mortgages. The value is based on the cash flows of the underlying assets.

Yield to worst
The lowest yield a bond with a special feature (such as a call option) can achieve provided the issuer does not default. When used to describe a portfolio, this statistic represents the weighted average across all the underlying bonds held.

Janus Henderson
INVESTORS

Any investment application will be made solely on the basis of the information contained in the Fund's prospectus (including all relevant covering documents), which will contain investment restrictions. This is a marketing communication and is intended as a summary only and potential investors must refer to the prospectus of the UCITS and to the KID before investing. Information is provided on the Fund on the strict understanding that it is only for clients resident outside the USA. A copy of the Fund's prospectus and key information document can be obtained from Janus Henderson Investors UK Limited in its capacity as Investment Manager and Distributor. Nothing in this communication is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units. Deductions for charges and expenses are not made uniformly throughout the life of the investment but may be loaded disproportionately at subscription. If you withdraw from an investment up to 90 calendar days after subscribing you may be charged a Trading Fee as set out in the Fund's prospectus. This may impact the amount of money which you will receive and you may not get back the amount invested. The value of an investment and the income from it can fall as well as rise significantly. Some Sub-Funds of the Fund can be subject to increased volatility due to the composition of their respective portfolios. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially. The Fund is a recognised collective investment scheme for the purpose of promotion into the United Kingdom. Potential investors in the United Kingdom are advised that all, or most, of the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Fund and that compensation will not be available under the United Kingdom Financial Services Compensation Scheme. The Fund is a foreign collective investment scheme registered in the Netherlands with the Authority for the Financial Markets and in Spain with the CNMV with the number 353. A list of distributors is available at www.cnmv.es. For sustainability related aspects please access Janushenderson.com. We may record telephone calls for our mutual protection, to improve customer service and for regulatory record keeping purposes. With effect from 1 January 2023, the Key Investor Information document (KIID) changed to the Key Information Document (KID), except in the UK where investors should continue to refer to the KIID.
