Objective and investment policy

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period, and particularly over the shorter term the Fund may experience periods of negative returns. Consequently your capital is at risk.

Performance target: To outperform the US Base Rate, after the deduction of charges, over any 3 year period.

The Fund invests in shares and makes extensive use of derivatives (complex financial instruments) to take both 'long' and 'short' positions in companies the investment manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario.

Typically, the Fund will match each long position in a company with an equivalent sized short position in another company (known as a 'pair'), with the aim of benefitting from price divergence between the long and short exposures of the pair, while minimising the effect of wider market movements.

The Fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives.

The Fund is actively managed with reference to the US Base Rate as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). For currency hedged Share Classes, the central bank rate that corresponds with the relevant Share Class currency is used as the basis of the performance comparison and for calculating performance fees. The investment manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

INVESTORS

What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The Fund involves a high level of buying and selling activity and as such will incur a higher level of transaction costs than a fund that trades less frequently. These transaction costs are in addition to the Fund's Ongoing Charges.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
