# HORIZON JAPANESE SMALLER COMPANIES FUND

F2 USD ISIN LU1562333077

## Investment objective

The Fund aims to provide capital growth over the long term. Performance target: To outperform the Russell/Nomura Small Cap Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

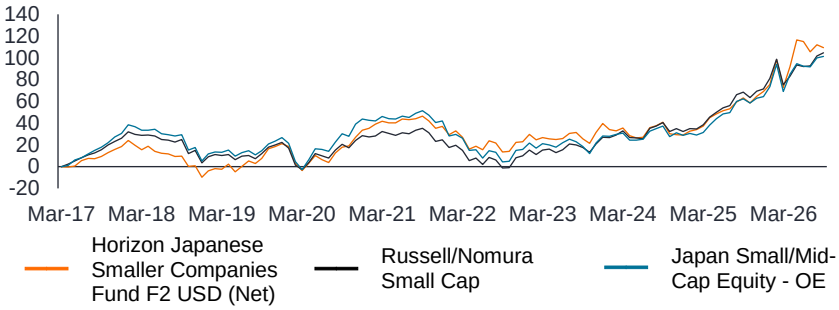

For the fund's investment policy, refer to the Additional fund information on page 3.
**Past performance does not predict future returns.**

## Fees & charges (%)

| | |
|---|---|
| **Annual management charge (AMC)** | 0.40 |
| **Performance fee description** | 10% of any returns that subject to a high water mark the share class achieves above the Russell/Nomura Small Cap Index |
| **Ongoing charge (OCF)** | 1.09 |

All ongoing charges stated are as per latest published report and accounts.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Performance fees may be charged before the Fund's outperformance target is reached.

Performance fees are charged separately as a way of rewarding the investment manager for superior returns or for outperforming specified targets. A Performance Fee is accrued where the NAV outperforms the relevant Hurdle NAV (subject to a High Water Mark). For further explanation of the performance fee calculation methodology please see the relevant prospectus, available at www.janushenderson.com.

Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

# Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target wording within the objective. The performance data does not take account of the initial charge and Janus Henderson does not currently levy a redemption charge. From 17 November 2014, the base currency of the fund changed from USD to JPY. From 1 November 2015, the Fund changed its benchmark from Tokyo SE Second Section Index to the Russell/Nomura Small Cap Index. The benchmark shown is a composite of the two. Past performance shown before 1 November 2015 was achieved under circumstances that no longer apply. 100% of the Annual Management Charge is taken from capital. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. The performance fee described on page 2 will be applicable if the fund achieves a return in excess of the High Water Mark and the Russell/Nomura Small Cap Index. Investors should refer to the prospectus for full details on performance fee where a performance fee is applicable. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Ongoing charge represents the ongoing costs to the fund, which includes the AMC and other charges for services such as keeping a register of investors, calculating the price of the fund's units or shares and keeping the fund's assets safe. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. The ongoing charge is calculated using the PRIIP methodology. The PRIIP methodology differs to the UCITS ongoing charge methodology, as the PRIIP methodology captures additional recurring charges, including but not limited to: Interest paid on borrowing (e.g. bank interest); Any fees incurred in relation to stock-lending activity (i.e. the fee paid to the lending agent); Any costs associated with holding closed-ended vehicles. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

## Investment policy

The Fund invests at least two-thirds of its assets in a portfolio of shares (equities) and equity-related securities of smaller companies, in any industry, in Japan. The Fund may also invest in other assets including companies of any size, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the Russell/Nomura Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

## Investment strategy

The Investment Manager believes in-depth stock analysis, coupled with superior stock picking are the main drivers of superior long-term performance in Japanese smaller companies. The Fund is designed to capture the undervalued growth potential of Japanese smaller companies by typically investing in the smallest 25% of listed Japanese companies by market capitalisation using a disciplined, pragmatic and risk-aware investment process. The investment approach focuses on stock valuation, investment catalysts and long-term structural growth to drive earnings and returns.

## Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses. High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

## Source for fund ratings/awards

Where available, overall Morningstar Rating™ is shown for share classes achieving a rating of 4 or 5 stars.

# Glossary

**Beta**
Beta measures how a fund or security moves in relationship to the overall market. A market has a beta of 1. If the fund/security's beta is more than 1, it moves more than the market, while a beta lower than 1 means it moves to a lesser extent than the market. A negative beta could mean the fund/security moves in the opposite direction to the market.

**Historic Yield**
The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

**Price-to-book (P/B) ratio**
A financial ratio used to value a company's shares. It is calculated by dividing a company's market value (share price) by the book value of its equity (value of the company's assets on its balance sheet). A P/B value <1 can indicate a potentially undervalued company or a declining business. The higher the P/B ratio, the higher the premium the market is willing to pay for the company above the book (balance sheet) value of its assets.

**Price-to-earnings (P/E) ratio**
A popular ratio used to value a company's shares, compared to other stocks, or a benchmark index. It is calculated by dividing the current share price by its earnings per share.

**Sharpe ratio**
This measures a portfolio's risk-adjusted performance. A high Sharpe ratio indicates a better risk-adjusted return. The ratio is designed to measure how far a portfolio's return can be attributed to fund manager skill as opposed to excessive risk taking.

**Standard deviation**
A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.

**Tracking error**
This measures how far a portfolio's actual performance differs from its benchmark index. The lower the number, the more closely it resembles the index.

**Weighted average market cap**
The average market capitalisation of a holding, weighted by the size of that position in a portfolio or index.

Janus Henderson
INVESTORS

This product integrates ESG but does not pursue a sustainable investment strategy or have a sustainable investment objective or otherwise take ESG factors into account in a binding manner. ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights in a non-binding manner alongside traditional measures into the investment decision process to improve long-term financial outcomes of portfolios. ESG related research is one of many factors considered within the investment process and in this material we seek to show why it is financially relevant. **Solely for US Financial Professionals servicing non-US persons. Not for onward distribution.** Any investment application will be made solely on the basis of the information contained in the Fund's prospectus (including all relevant covering documents), which will contain investment restrictions. This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions. A copy of the Fund's prospectus and key information document can be obtained from Janus Henderson Investors UK Limited in its capacity as Investment Manager and Distributor as well as Janus Henderson Investors Europe S.A. Nothing in this communication is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units. Deductions for charges and expenses are not made uniformly throughout the life of the investment but may be loaded disproportionately at subscription. If you withdraw from an investment up to 90 calendar days after subscribing you may be charged a Trading Fee as set out in the Fund's prospectus. This may impact the amount of money which you will receive and you may not get back the amount invested. The value of an investment and the income from it can fall as well as rise significantly. Some Sub-Funds of the Fund can be subject to increased volatility due to the composition of their respective portfolios. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially. For sustainability related aspects please access Janushenderson.com. We may record telephone calls for our mutual protection, to improve customer service and for regulatory record keeping purposes. With effect from 1 January 2023, the Key Investor Information document (KIID) changed to the Key Information Document (KID), except in the UK where investors should continue to refer to the KIID. The Janus Henderson Horizon Fund (the "Fund") is a Luxembourg SICAV incorporated on 30 May 1985, managed by Janus Henderson Investors Europe S.A. Shares of the Janus Henderson Horizon Fund may not be directly or indirectly offered or sold to U.S. Persons and may not be offered or sold in any jurisdiction where such offering or sale is prohibited. Please contact your Janus Henderson Investors representative if you are unsure of the availability of the Funds in your client's jurisdiction. It is the responsibility of any persons wishing to distribute and/or purchase shares of the Funds to comply with all applicable laws and regulations of any jurisdiction in which Fund shares or any related literature, will be distributed or purchased. This communication should only be read by professional financial advisors and, at their exclusive discretion, their eligible clients, and is not for onward or public distribution. Financial advisers are responsible for determining whether an investment in the Fund, and which share class, is suitable for their clients. Issued by Janus Henderson Investors.
