JANUS HENDERSON HORIZON FUND - SUSTAINABLE FUTURE TECHNOLOGIES FUND

A2 USD ISIN LU2342242398

Key investment risks:
- The Fund's investments in equities are subject to equity securities risk due to fluctuation of securities values.
-Investments in the Fund involve general investment, currency, liquidity, hedging, market, economic, political, regulatory, taxation, securities lending related, reverse repurchase transactions related, small/ mid-capitalisation companies related, financial and interest rate risks. In extreme market conditions, you may lose your entire investment.
-The Fund may invest in financial derivatives instruments to reduce risk and to manage the Fund more efficiently. This may involve counterparty, liquidity, leverage, volatility, valuation and over-the-counter transaction risks and the Fund may suffer significant losses.
-The Fund's investments are concentrated in technology sector and may be more volatile and subject to technology related companies risk.
-The Fund may be subject to various risks relating to sustainable investment approach: concentration, subjective judgment in investment selection, performance, reliance on corporate data or third-party information, screening, and change in investments' nature.
-Investors should not only base on this document alone to make investment decisions and should read the offering documents including the risk factors for further details.

Investment Objective and Strategy

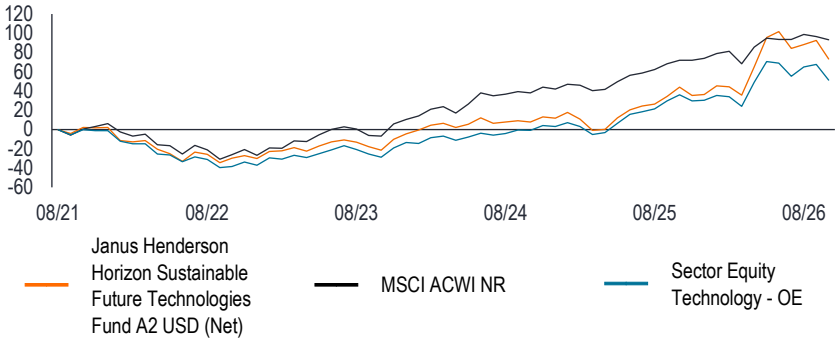

The Fund aims to provide capital growth over the long term by investing in technology-related companies that contribute to the development of a sustainable global economy. The Fund invests at least 90% of its net assets in equities or equity-related instruments of technology-related companies of any size, including smaller capitalization companies, in any country whose products and services are considered by the Investment Manager as contributing to positive environmental or social change, thereby having an impact on the development of a sustainable global economy. The Fund investment universe is defined by technology-related companies that derive at least 50% of their current or future expected revenues from the sustainable technology themes identified by the Investment Manager. The Fund will avoid investing in companies that the Investment Manager considers could contribute to significant environmental or societal harm.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com. Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Janus Henderson Horizon Sustainable Future Technologies Fund's investment objective and policy were changed effective 4 December 2024. Effective 4 December 2024, the benchmark of the Janus Henderson Horizon Sustainable Future Technologies Fund was changed from MSCI ACWI Information Technology Index to MSCI ACWI Index. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Source for fund ratings/awards

Where available, overall Morningstar Rating™ is shown for share classes achieving a rating of 4 or 5 stars. Towards Sustainability: From 20 Jun 26 to 31 Dec 26, for professional and end investors. The country of use for this award is Belgium.

Glossary

Active share
This measures how much a portfolio's holdings differ from its benchmark index. For example, a portfolio with an active share of 60% indicates that 60% of its holdings differ from its benchmark, while the remaining 40% mirror the benchmark.

Beta
Beta measures how a fund or security moves in relationship to the overall market. A market has a beta of 1. If the fund/security's beta is more than 1, it moves more than the market, while a beta lower than 1 means it moves to a lesser extent than the market. A negative beta could mean the fund/security moves in the opposite direction to the market.

Price-to-book (P/B) ratio
A financial ratio used to value a company's shares. It is calculated by dividing a company's market value (share price) by the book value of its equity (value of the company's assets on its balance sheet). A P/B value <1 can indicate a potentially undervalued company or a declining business. The higher the P/B ratio, the higher the premium the market is willing to pay for the company above the book (balance sheet) value of its assets.

Price-to-earnings (P/E) ratio
A popular ratio used to value a company's shares, compared to other stocks, or a benchmark index. It is calculated by dividing the current share price by its earnings per share.

Sharpe ratio
This measures a portfolio's risk-adjusted performance. A high Sharpe ratio indicates a better risk-adjusted return. The ratio is designed to measure how far a portfolio's return can be attributed to fund manager skill as opposed to excessive risk taking.

Standard deviation
A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.

Tracking error
This measures how far a portfolio's actual performance differs from its benchmark index. The lower the number, the more closely it resembles the index.

Weighted average market cap
The average market capitalisation of a holding, weighted by the size of that position in a portfolio or index.

Investing involves risk, including the possible loss of principal and fluctuation of value.**
Janus Henderson Horizon Fund is an open ended investment company incorporated in Luxembourg as a société d'investissement à capital variable ("SICAV") on 30 May 1985. Investors are warned that they should only make their investments based on the most recent offering documents which contains information about fees, expenses and risks, which is available from appointed intermediaries, and which should be read carefully. An investment in the Fund may not be suitable for all investors and is not available to all investors in all jurisdictions; it is not available to US persons. The rate of return may vary and the principal value of an investment will fluctuate due to market and foreign exchange movements. Shares, if redeemed, may be worth more or less than their original cost. Investors are advised to consult your intermediary who will give you advice on the product suitability and help you determine how your investment would be consistent with your own investment objectives. The investment decisions are yours and an investment in the Fund may not be suitable for everyone. If in doubt, please contact your intermediary for clarification. Portfolio holdings are subject to change without notice.
