Objective and investment policy

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the S&P Global Natural Resources Accumulation Index NR by 2.5% per annum, before the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, whose revenues come mostly from the mining, energy and agriculture sectors, in any country.

The Fund is actively managed with reference to the S&P Global Natural Resources Accumulation Index NR, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Additional information

Please note that 90 West AM is now Janus Henderson Investors (Australia) Institutional Funds Management Limited. The ongoing charge is estimated because the shareclass has insufficient track record for us to calculate it exactly. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the fund.

Please note that as of 1 November 2019, Tal Lomnitzer took over co-management of this fund from David Whitten.

This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Note that any difference among portfolio securities currencies, share class currencies and your home currency will expose you to currency risk.
