

HORIZON EMERGING MARKETS EX-CHINA FUND

At a glance

Performance*

The Fund returned -3.84%, the Index returned -0.97% and the Sector returned -0.79%.

Contributors/detractors

Positions in Silergy and Accton Technology detracted from relative fund performance, while investments in Lite-On Technology and Allegro.eu contributed.

Outlook

We continue to see long-term investment opportunities in emerging market equities, supported by secular growth trends.

Portfolio management

Matthew Culley

Doug Turnbull

Investment environment

- Emerging market equities were volatile as geopolitical tensions pushed oil prices higher, contributing to increased inflation, higher interest rates and tighter central bank policy.
- While enthusiasm for artificial intelligence (AI) remained strong, concerns about valuations and the sustainability of the recent rapid pace of AI-related capital spending weighed on some AI-related shares.
- This contributed to divergent performance between the technology-heavy markets of Taiwan, where shares outperformed, and South Korea, where stocks ended the period lower.

Portfolio review

Relative performance was hindered by the position in Silergy, a China-facing but globally relevant analog semiconductor maker. Silergy produces integrated circuits used in power management. The company has seen accelerating demand for its products from the automotive, data centre and industrial segments, while tight supply conditions have supported pricing and margins. Its shares sold off in July, along with other global semiconductor shares, as investors grew more cautious about the expected pace of AI-related capital spending. However, we continue to see potential opportunity in Silergy, particularly

given expectations for resilient demand for analog semiconductors and the growing market penetration of electric vehicles (EVs) in China.

Taiwan-based Accton Technology was another relative detractor as its shares gave back some of their strong performance from earlier in the year. Accton Technology is a supplier of "white box" (or unbranded) networking equipment, which provides a cost-effective alternative to branded equipment. The company has experienced surging demand for its high-speed 400G and 800G network switches to support the deployment of AI, which has driven very strong revenue growth. We remain constructive on the outlook for AI-related capital spending, and we believe Accton could be well positioned to benefit from this spending, supported by its customer relationships and operational efficiencies.

Relative contributors included Lite-On Technology, a Taiwan-based manufacturer of semiconductor components, power management modules, server racks, and other equipment required for the data centre build-out. The company has benefited from the expansion of its cloud computing business, which now accounts for about half of its revenues. The company reported very strong financial results, supported by strong global demand for AI infrastructure and advanced data centre power products. From a competitive standpoint, we believe the company is

References made to individual securities do not constitute a recommendation to buy, sell or hold any security, investment strategy or market sector, and should not be assumed to be profitable. Janus Henderson Investors, its affiliated advisor, or its employees, may have a position in the securities mentioned. There is no guarantee that past trends will continue, or forecasts will be realised.

*For benchmark and sector, if applicable, refer to Fund details on page 3. For relevant descriptions, risks and the Fund's investment policy statement, refer to Additional fund information on page 4.

gaining traction in the data centre business due to its supply chain diversification and customer partnerships. Allegro.eu was another relative contributor. Allegro.eu owns an established online shopping platform in Poland and ecommerce websites in Europe. We continue to observe strong fundamentals for the company, supported by resilient sales growth, increased logistics investments and improved economic trends in Eastern Europe.

Manager outlook

As we look ahead, we remain constructive on the long-term outlook for the AI investment cycle, as tight supply chains across parts of Asia have continued to support pricing power for companies operating at critical points in the AI ecosystem. At the same time, we recognise that we may experience periods of volatility and market consolidation as the AI story continues to evolve. At this stage of the investment cycle, we believe the duration of spending is more important than its magnitude. Spending levels are already high, and investor concerns have increasingly centred on sustainability rather than scale. While these concerns pressured AI-related shares in the third quarter, we believe some moderation may support a more sustained investment cycle while giving companies time to address potential constraints related to financing,

infrastructure, power availability, labour, and policy uncertainty. Given our conviction around the importance of this investment theme, we remain highly invested in opportunities tied to AI-related capital spending, which we believe could be a key driver of emerging market growth over time.

The remainder of the portfolio is more thematically diverse, reflecting areas where we have identified what we see as underappreciated and mispriced growth opportunities. We continue to focus on companies we believe are well positioned for long-term outperformance, including those benefiting from secular trends such as AI and increased electrification. We remain committed to regularly revisiting our investment theses, updating our models, and challenging our assumptions to help ensure that every position remains justified. This disciplined approach has helped us stay invested in successful holdings when fundamentals remain supportive, rather than exiting positions simply because share prices have risen or because stocks experience short-term volatility. Through this disciplined, patient, and fundamentals-driven approach, we aim to provide investors with strong long-term performance.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **Past performance does not predict future returns.** Performance/performance target related data will display only where relevant to the share class inception date and annualised target time period. **The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.** Source for target returns (where applicable) - Janus Henderson Investors.

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com.

Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations.

Performance fees may be charged before the Fund's outperformance target is reached. Performance fees are charged separately as a way of rewarding the investment manager for superior returns or for outperforming specified targets. A Performance Fee is accrued where the NAV outperforms the relevant Hurdle NAV (subject to a High Water Mark). For further explanation of the performance fee calculation methodology please see the relevant prospectus, available at www.janushenderson.com.

Investment objective

The Fund aims to provide capital growth over the long term. Performance target: To outperform the MSCI EM ex-China 10/40 Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

For the fund's investment policy, refer to the Additional fund information on page 4.

Past performance does not predict future returns.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Availability of share classes shown may be limited by law in certain jurisdictions. Performance records/scenarios are detailed within the fund's specific KIID/KID; fees and charges, and the respective risk rating may vary. Further information can be found in the fund's prospectus and KIID/KID, which must be reviewed before investing. Please consult your local sales representative and/or financial adviser if you have any queries. Effective 29 May 2026, the benchmark of the Janus Henderson Horizon Emerging Markets ex-China Fund was changed from MSCI EM ex-China Index to MSCI EM ex-China 10/40 Index. Prior to this, the benchmark was changed from MSCI AC Asia Pacific ex Japan Index to MSCI EM ex-China Index on 3 December 2024. Prior to this, the benchmark was changed from MSCI AC Asia ex Japan Index to MSCI AC Asia Pacific ex Japan Index on 2 May 2017. The Investment Policy and Strategy also changed. Past performance shown prior to this date was achieved under circumstances that no longer apply. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Ongoing charge represents the ongoing costs to the fund, which includes the AMC and other charges for services such as keeping a register of investors, calculating the price of the fund's units or shares and keeping the fund's assets safe. These are the views of the author at the time of publication and may differ from the views of other individuals/teams at Janus Henderson Investors. Any securities, funds, sectors or indices mentioned within this article do not constitute or form part of any offer or solicitation to buy or sell them. The information in this commentary does not qualify as an investment recommendation. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. The ongoing charge is calculated using the PRIIP methodology. The PRIIP methodology differs to the UCITS ongoing charge methodology, as the PRIIP methodology captures additional recurring charges, including but not limited to: Interest paid on borrowing (e.g. bank interest); Any fees incurred in relation to stock-lending activity (i.e. the fee paid to the lending agent); Any costs associated with holding closed-ended vehicles. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Investment policy

The Fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies having their registered office in emerging markets and or companies that do not have their registered office in emerging markets but either (i) carry out a predominant proportion of their business activity in these markets, or (ii) are holding companies which predominantly own companies with registered offices in emerging markets. In this context, the term "emerging markets" means countries included in the MSCI EM ex-China 10/40 Index or those which are referred to by the World Bank as developing countries or those countries which are, in the Investment Manager's opinion, developing countries. The companies can be of any size, in any industry. The Fund may also invest in other assets including companies outside emerging markets, investment grade government bonds, cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the MSCI EM ex-China 10/40 Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Investment strategy

The Investment Manager seeks consistent risk-adjusted returns (an expression of an investment's return through how much risk is involved in producing that return) by looking to identify the most attractive opportunities within countries in emerging markets. The portfolio attempts to capture price inefficiencies (benefit from differences between the price that the fund can buy or sell company shares, compared to the Investment Manager's opinion of their true value), across companies of all sizes, by combining fundamental company research, market and economic analysis, and corporate governance and quantitative input. Where the fund invests in sectors dominated by state-owned entities, companies within the sectors may be excluded if they are assessed by the investment manager as having poor corporate governance.

Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses. Emerging markets expose investors to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures. High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio. When a portfolio is concentrated (has a significant portion of its assets invested in a limited number of holdings), an adverse event impacting even a small number of holdings could create significant volatility or losses. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

This product integrates ESG but does not pursue a sustainable investment strategy or have a sustainable investment objective or otherwise take ESG factors into account in a binding manner. ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights in a non-binding manner alongside traditional measures into the investment decision process to improve long-term financial outcomes of portfolios. ESG related research is one of many factors considered within the investment process and in this material we seek to show why it is financially relevant. **Solely for US Financial Professionals servicing non-US persons. Not for onward distribution.** Any investment application will be made solely on the basis of the information contained in the Fund's prospectus (including all relevant covering documents), which will contain investment restrictions. This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions. A copy of the Fund's prospectus and key information document can be obtained from Janus Henderson Investors UK Limited in its capacity as Investment Manager and Distributor as well as Janus Henderson Investors Europe S.A. Nothing in this communication is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not

form part of any contract for the sale or purchase of any investment. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units. Deductions for charges and expenses are not made uniformly throughout the life of the investment but may be loaded disproportionately at subscription. If you withdraw from an investment up to 90 calendar days after subscribing you may be charged a Trading Fee as set out in the Fund's prospectus. This may impact the amount of money which you will receive and you may not get back the amount invested. The value of an investment and the income from it can fall as well as rise significantly. Some Sub-Funds of the Fund can be subject to increased volatility due to the composition of their respective portfolios. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially.
