# **HENDERSON VALUE TRUST PLC HALF-YEAR REPORT** (unaudited) for the six months ended 31 March 2015 www.hendersonvaluetrust.com

# **Investment Objective**

The Company exploits global opportunities to provide long-term growth to shareholders via a diversified, international, multi-strategy portfolio which offers access also to specialist funds including hedge and private equity. The Company aims to outperform the FTSE World Index on a total return basis.

#### INTERIM MANAGEMENT REPORT

#### **CHAIRMAN'S STATEMENT**

## **Continuation Vote and Tender Offer**

The Company passed its triennial continuation vote in December 2014 by a significant margin. On behalf of the Board I would like to thank shareholders for their continued support. This has now given our Fund Managers the necessary time that they need to complete the final leg of their portfolio restructuring and to put the Company firmly back on the path of attractive long-term performance.

The tender offer for up to 10% of the Company's shares, which was conditional upon the passing of the continuation vote, was fully subscribed and completed in January. This returned a total of £12.8 million to tendering shareholders at a discount of 2% to NAV less costs.

#### **Performance**

During the half-year the Company delivered a NAV total return of -0.4% compared with a 12.4% rise in its FTSE World Index benchmark. Portfolio performance is reviewed in the Fund Managers' Report.

Following the continuation vote and the completion of the tender offer there was some selling pressure on the Company's shares which contributed to the Company's share price discount to NAV per share widening to 20.8% by the half-year end.

Your Directors consider the current level of discount to be unsatisfactory. Improved NAV performance and the successful marketing of the Company's shares will be the main levers for narrowing the discount. We look to the Company's Fund Managers to deliver positive results in these areas as soon as possible and for continued improved performance to be attained over the next 18 months.

# **Benchmark**

During February, the Board undertook a review of the suitability of the Company's FTSE World Index benchmark and concluded that it should be retained. Given the risk and income profile of the Company's alternative and specialist investments, the Board believes that shareholders should expect a return above that of global equity markets over the longer-term. The FTSE World Index therefore represents a sensible long-term return target for the Company.

The Board acknowledges, however, that the FTSE World Index, which has been the Company's benchmark since 1991, is dominated by developed equity markets. Given the growth of emerging equity markets since the Company's inception, and the fact that the Company's portfolio includes a number of emerging market exposures, the Board has decided to adopt an additional informal performance measure which we will also report against. This will be a composite index comprising the FTSE Developed Index total return (75%) and the FTSE Emerging Market Index total return (25%).

## **Proposed Change of Name**

The Board is recommending that shareholders consider a change of name to Henderson Alternative Strategies Trust plc. This name better reflects the composition of the Company's portfolio of alternative and specialist investments and reinforces that we are seeking to deliver global equity market returns through a distinct and differentiated approach, including access to specialist funds not otherwise available through the market. A circular describing the change of name proposal in more detail will be announced shortly and posted to shareholders along with the Company's Half-year Update.

## **Change of Broker**

During March the Company announced that it has changed brokers from Panmure Gordon & Co to Stifel Nicolaus Europe Limited (previously Oriel Securities). The Board would like to record its thanks to Panmure Gordon & Co for its valuable efforts.

## Outlook

In our last Annual Report, I said that the future for Henderson Value Trust is now brighter than at any time in recent years. Your Board firmly believes that the Company is now back on the right path with two years of major transitioning and restructuring behind us. Despite the disappointing NAV return for the half-year, the performance of new investments made by Henderson is encouraging. Your Board regards continued improved performance as a top priority in the near-term and we will pursue also a sustained marketing campaign to attract a wider investor base. All of the Directors now own shares in the Company which is a further indication of your Board's confidence in the Company's future.

Richard Gubbins Chairman 21 May 2015

#### **FUND MANAGERS' REPORT**

## **Portfolio Activity**

Our portfolio restructuring is now well-advanced. At the half-year end 71% of the total investment portfolio comprised nineteen investments selected by Henderson and six inherited positions we plan to retain. We expect this figure to increase to approximately 85% by the 30 September 2015 financial year-end, with the then remaining 15% of relatively illiquid inherited investments generating cash flow for redeployment over the following six months.

Although it was necessary to accumulate a significant level of cash in anticipation of the Company's tender offer, we still managed to make a number of exciting and, we believe, high-quality investments during the period.

For example, we spent £3.8 million on a holding in **Riverstone Energy Limited**, a UK-listed private equity fund mainly targeting the US shale oil and gas sector. The experienced managers of this fund have successfully accelerated their deployment of capital since last year's oil price fall. We invested £4.0 million in **Ediston Property Investment Company plc**, a small fund focused on regional UK commercial property where attractive returns are available. We invested in its IPO (Initial Public Offering), having been particularly impressed during our due diligence process by the quality and experience of the management team and the growth potential of the initial property portfolio. We also invested £4.0 million in **Pershing Square Holdings Limited**, a US focused activist investment fund with an outstanding long-term performance record.

## **Portfolio Performance**

Although the Company's NAV per share fell slightly by 0.4% during the period, this masks some encouraging developments within the investment portfolio. In particular, the new investments made by Henderson which were in the portfolio during the half-year have themselves generated a six-month gross total return of 3.6%. This was achieved despite the fact that some of these holdings were either still in capital deployment mode or were not part of the Company's portfolio over the full half-year period.

We also estimate that in the 18-month period to 31 March 2015 new investments made by Henderson have themselves generated a gross total return of 12.4% (8.1% annualised). This period excludes the first six months of Henderson's management of the Company's portfolio during which a detailed review of existing holdings took priority over new investment activity. As additional new investments are made over the coming months and the portfolio restructuring is completed, we believe this level of performance bodes well for the Company's future NAV growth prospects.

During the half-year there were notable positive contributions from a range of funds. Apart from the three new investments mentioned above, other strong performers were the **BlackRock European Hedge Fund Limited** (a Henderson selection) and two inherited holdings which we hold in high regard, being **Value Partners China Greenchip Limited** and **Oryx International Growth Fund Limited**.

On the negative side, **BlackRock World Mining Trust plc** continued to underperform and we sold our entire holding during the period. This, combined with earlier disposals, means that the Company's exposure to basic resources has now been reduced to 2.2%. The Company's Russian private equity holdings in two **Baring Vostok Investments Limited** share classes also disappointed given Russia's difficult macro and political backdrop. Despite this, we continue to believe that, over the medium-term, the quality of the underlying assets in this vehicle combined with the manager's experience and outstanding track record will generate attractive returns from current valuation levels. The Company's exposure to Russian assets at the half-year end was 6.4%.

## Outlook

The Company's global equity FTSE World Index benchmark continued to perform strongly during the half-year. Given the extent to which the benchmark is dominated by the US this was not a surprise with US equity markets pushing to new highs and the US dollar strengthening significantly against sterling (thereby further boosting the level of the Company's sterling based benchmark). Although the Company's short-term performance understandably attracts the market's attention, our goal is to beat the benchmark over the longer-term by accessing good-quality investments across the global alternative asset and specialist fund sector rather than invest in mainstream funds which are strongly correlated to global equity markets. Once the portfolio restructuring is completed, shareholders should expect to begin, in a consistent manner, to reap the benefits of the investment approach we have adopted.

During the second half of the Company's financial year we are likely to make approximately five new investments taking the number of core holdings we currently expect to keep for the medium to long-term to around 30. This reflects our strategy to run a more concentrated higher-conviction portfolio within our well-structured risk management framework.

One of these investments has already been made since the half-year end, being a £4.8 million commitment to **Mantra Secondary Opportunities**. This is a small unlisted vehicle which invests in mature private equity partnerships at attractive valuations across the globe. One-third of the Company's commitment has already been drawn. This type of niche, hard-to-access fund reflects one of our key investment themes (mature private equity funds) and is viewed as an excellent fit for the Company. We are also seeking investments to add European and Asian exposure to the Company's portfolio.

## Marketing

Apart from improved investment performance, an effective and sustained marketing programme to existing and new investors is now key to attracting more buyers of the Company's shares. With last December's continuation vote successfully behind us, and with a clear and differentiated investment mandate and an investment portfolio which we believe contains multiple NAV growth opportunities, we are now embarking on a renewed marketing campaign to attract a wider investor base.

# **Related Party Transactions**

Other than the relationship between the Company and its Directors, the provision of services by Henderson is the only related party arrangement currently in place as defined in the Listing Rules. Other than fees payable by the Company in the ordinary course of business, there have been no material transactions with the Company's related parties affecting the financial position or performance of the Company during the period under review.

## **Principal Risks and Uncertainties**

The principal risks and uncertainties associated with the Company are market related and include market price, foreign exchange, interest rate, liquidity and credit risk.

Information on these risks is given in the Annual Report for the year ended 30 September 2014. In the view of the Board these principal risks and uncertainties are applicable to the remaining six months of the financial year as they were to the six months under review.

#### **Going Concern**

Having considered the Company's investment objective, risk management and capital management policies, the nature of the portfolio and expenditure projections, the Directors believe that the Company has adequate resources and an appropriate financial structure in place to continue in operational existence for the foreseeable future. The Board considers that there is reasonable evidence to support continuing to adopt the going concern basis in preparing the financial statements.

## Statement of Directors' Responsibilities

The Directors confirm that, to the best of their knowledge:

- a) the financial statements for the half-year ended 31 March 2015 have been prepared in accordance with the Accounting Standards Board's statement 'Half-Yearly Financial Reports';
- b) the Interim Management Report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.7R (indication of important events during the first six months and description of principal risks and uncertainties for the remaining six months of the year); and
- c) the Interim Management Report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.8R (disclosure of related party transactions and changes therein).

## NOTES TO THE FINANCIAL STATEMENTS

# 1. Accounting policies - basis of preparation

The condensed set of financial statements has been prepared using the same accounting policies as are set out in the Company's Annual Report for the year ended 30 September 2014 and in accordance with IAS 34. The financial statements have not been audited or reviewed by the Company's auditor.

## 2. Expenses and Management Fees

Expenses, finance costs and taxation for the period over the six months to 31 March 2015.

Henderson Investment Funds Limited ('Henderson') receives a management fee of 0.7% per annum, payable quarterly in arrears based on the level of net chargeable assets at the relevant quarter end. Management fees are allocated 90% to capital and 10% to revenue.

## 3. Return/(loss) per ordinary share

The return/loss per ordinary share figure is based on the net loss for the half-year of £1,419,000 (half-year ended 31 March 2014: net profit £977,000; year ended 30 September 2014: net profit £1,544,000) and on 45,757,389 (half-year ended 31 March 2014: 47,751,404; year ended 30 September 2014: 47,751,404) ordinary shares, being the weighted average number of ordinary shares in issue during the period.

The earnings per ordinary share figure detailed above can be further analysed between revenue and capital, as below.
