Janus Henderson

Global Short Duration Income Opportunities Fund Class AB2 USD ISIN: IE0006YJ62B6

A sub-fund of Janus Henderson Capital Funds plc, an Irish Investment Company (IIC) managed by Janus Henderson Investors Europe S.A.
Fund Currency: USD Share Class Currency: USD

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of income and capital growth, while seeking to limit losses to capital (although not guaranteed).

Performance target: To outperform the ICE BofA 3-Month U.S. Treasury Bill Index by at least 3% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in a global portfolio of short duration bonds of any quality, including high yield (non-investment grade) and unrated bonds, issued by companies or governments, asset-backed and mortgage backed securities. The overall duration of the Fund is typically less than three years and may at times also be negative.

The Fund may also invest in other assets including cash and money market instruments. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body.

The Sub-Investment Adviser makes extensive use of derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the ICE BofA 3-Month U.S. Treasury Bill Index as this forms the basis of the Fund's performance target. The Sub-Investment Adviser has a high degree of freedom to choose individual investments for the Fund.

Strategy

The Sub-Investment Adviser constructs a portfolio around a core of shorter maturity, global investment grade bonds seeking to generate yield above cash, and by applying secular and opportunistic views across countries, currencies and sectors to enhance return and mitigate downside risk. The Sub-Investment Adviser will seek to manage the portfolio through the various market environments using a variety of strategies, including (but not limited to) adjusting the overall credit exposure, credit quality, and interest rate duration of the portfolio and the allocation to cash. The Fund seeks the best risk adjusted opportunities across sectors, countries and credit risk.

Other Information The Sub-Investment Adviser will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Sub-Investment Adviser considers could contribute to significant ESG harm, as further described in the prospectus.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Company's Prospectus.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	**2**	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on simulated historic volatility. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 2 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

High Yield Bonds While high yield (non-investment grade) bonds generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Asset-Backed Securities Asset-Backed Securities (ABS) and other forms of securitised investments may be subject to greater credit / default, liquidity, interest rate and prepayment and extension risks, compared to other investments such as government or corporate issued bonds and this may negatively impact the realised return on investment in the securities.

Prepayment and Extension Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted.

Derivatives and Leverage Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%

* The charges shown are maximum figures. In some cases you may pay less.

Charges taken from the Fund over a year

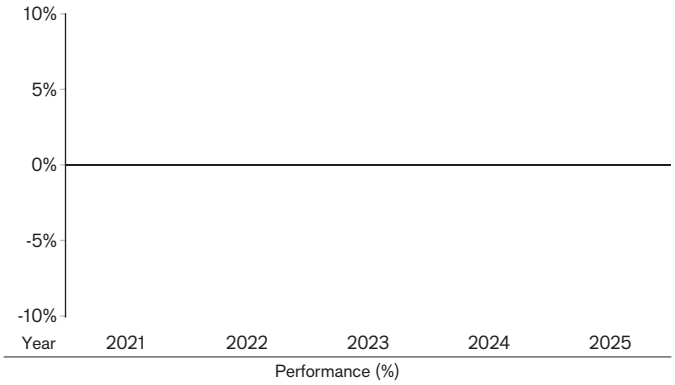

Ongoing Charges	0.95%

The ongoing charge figure is estimated because the share class has insufficient track record for us to calculate it exactly.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance

The past performance is calculated in USD.

The Fund launched in September 2014.

This share class has not yet been launched.

Insufficient data is available to provide a useful indication of past performance.

The Fund does not aim to track the performance of the benchmark.
