Objectives and investment policy

Investment Objective: The Sub-Fund aims to provide capital growth over the long term by investing in a concentrated, actively managed portfolio of equity securities issued by Japanese companies.

Investment Approach: Under normal circumstances, the Sub-Fund will invest at least 90% of its assets in equity securities or depositary receipts issued by Japanese companies. The Sub-Fund may invest in companies of any size in any industry.

• The Sub-Fund will typically have 20 - 30 holdings and is not expected to have fewer than 20 holdings. The Sub-Fund may also hold cash.

• Derivatives may be used for the purposes of hedging/risk reduction. The Sub-Fund will use forward FX contracts to hedge currency risk where it offers Hedged Share Classes.

• The Sub-Fund is actively managed. The benchmark indices, MSCI Japan and TOPIX, which broadly represents the companies in which the Sub-Fund may invest, are used for performance comparison purposes only. The Investment Manager has discretion to choose investments for the Sub-Fund from the Index Benchmark with weightings different to the Index Benchmark or not in the Index Benchmark.

• The Investment Manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Investment Manager considers could contribute to significant ESG harm, as further described in the supplement.

The Fund promotes environmental and social characteristics, as defined under Article 8 of SFDR.

– The Share Class of the Sub-Fund will accumulate income in its value.

– This Sub-Fund may not be appropriate for short-term investment.

– The Share Class is denominated in JPY. The Sub-Fund is denominated in JPY.

– In normal conditions, Authorised Participants may deal in shares directly with the Sub-Fund. Other investors can deal in shares daily through an intermediary on stock exchanges on which the shares are traded.

Risk and reward profile

Lower risk **Higher risk**

Typically lower rewards Typically higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class.

The risk category shown is not guaranteed and may shift over time.

The lowest category (Category 1) does not mean 'risk free'.

The Share Class is rated 6 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

– No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.

– Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

Active Management: Active management techniques that have worked well in normal market conditions could prove ineffective or negative for performance at other times.

Equities: Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

County or Region: High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Concentration: When a portfolio is concentrated (has a significant portion of its assets invested in a limited number of holdings), an adverse event impacting even a small number of holdings could create significant volatility or losses.

Derivatives: Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity: Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty and Operational Risks: Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
