Objectives and investment policy

Objective: The Sub-Fund aims to provide a steady income stream with capital preservation across various market cycles by investing in an actively managed portfolio of primarily short duration fixed income instruments.

Investment Approach: Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in a global portfolio of short duration fixed income instruments.The Sub-Fund primarily invests in investment grade debt securities, rated Baa3 or higher or, if unrated, determined by the Sub-Investment Manager to be of comparable quality.Such investments may be across multiple sectors including (but not limited to) certificates of deposit, treasury bills, government & government-related bonds (both fixed and floating rate), commercial paper, corporate bonds (both fixed and floating rate) and, to the extent set out below, ABS/MBS, with a focus on developed markets.The securities in which the Sub-Fund primarily invests have an expected maturity / weighted average life of less than five years.The Bloomberg Barclays Euro Treasury 0-3 Months Bond Index is used for performance comparison purposes only in the Sub-Fund's marketing materials, as applicable.The Sub-Fund is actively managed and does not seek to replicate the composition or performance of the Index Benchmark.The Sub-Fund may invest in both agency and non-agency MBS, subject to the limits included in the supplement.The Sub-Fund may invest a maximum of 15% in debt securities that are rated below investment grade, but it will not invest in securities rated below B3. The Sub-Fund may invest a maximum of 15% of its net assets in emerging markets. The Sub-Fund will normally limit its unhedged non-Base Currency exposure to 15% of its total assets.The Sub-Fund may invest up to 10% of its net asset value in the other Eligible Collective Investment Schemes , included those managed by the Sub-Investment Manager.The Sub-Fund may temporarily invest outside of these guidelines while dealing with subscriptions, redemptions, for liquidity management or for defensive purposes, including navigating unusual market conditions.The Sub-Fund may employ investment techniques and instruments (trading in futures, options, swaps, swaptions, CDS (both single name and indices) and forward currency exchange contracts) for efficient portfolio management or for investment purposes to gain or hedge exposure to the investments contemplated in these investment policies.The market risk of the Sub-Fund will be measured using the VaR methodology.

The Fund promotes environmental and social characteristics, as defined under Article 8 of SFDR.

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class.

The risk category shown is not guaranteed and may shift over time.

The lowest category (Category 1) does not mean 'risk free'.

The Share Class is rated 2 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

Active Management: Active management techniques that have worked well in normal market conditions could prove ineffective or negative for performance at other times.

Credit Risk: An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

County or Region: High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Derivatives: Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity: Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty and Operational Risks: Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
