What is this product?

Type

Janus Henderson Fixed Maturity Bond Fund (EUR) 2029 is a sub-fund of Janus Henderson Capital Funds plc, an investment company with variable capital organised under the laws of Ireland. Janus Henderson Capital Funds plc qualifies as an undertaking for collective investment in transferable securities (UCITS).

Term

This investment has a maturity date of 22 June 2029. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus.

Objectives

The Fund aims to provide a regular income while aiming to preserve the initial capital invested over the Term. The Fund is designed to be held until the end of the Term and investors should be prepared to remain invested until such date. The income amount or capital value is not guaranteed. The value of the shares at the end of the Term may be less than the value at the time of investment because of the Fund's distribution policy or market movements. The Fund invests in a portfolio of G10 government bonds and credit default swaps (CDS) on single name, baskets and indices of corporate issuers. In particular, the Fund will include Italian government bonds to which the Fund may have exposure of up to a maximum of 100% of its net asset value. The Fund may invest up to 100% in bonds issued or guaranteed by a single Member State, its local authorities, or a public international body of which one or more Member States are members. CDS will include both investment-grade and high-yield (non-Investment Grade) corporate issuers to enhance income. The CDS will generally have an average credit rating of BBB-/Baa3. The CDS may have up to 40% of its notional value in corporate issuers rated below Investment Grade. The Fund may also invest in high yield (non-Investment Grade) bonds, government bonds, municipal bonds, commercial paper, certificates of deposit and cash. The Fund may invest up to 10% of its net asset value in agency Mortgage-Backed Securities (which does not include Collateralised Mortgage Obligations). The Fund will not invest in contingent convertible bonds. The Fund may invest up to 10% in Collective Investment Schemes, including those managed by Janus Henderson. The Fund may invest up to 5% in unrated Debt Securities. The investment manager may use derivatives (complex financial instruments) to reduce risk, to manage the Fund more efficiently, or to generate additional capital or income for the Fund as well as for investment purposes. The Fund is managed on a buy and maintain basis without reference to a benchmark. Distributions will be calculated at the discretion of the Manager with a view to providing a consistent, higher level of distribution. Distributions include all income, and typically consists of a portion of realised and unrealised capital gains, which may include a portion of original capital invested. Charges will be deducted from capital. You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Fund's Prospectus. The Fund's Depositary is J.P. Morgan SE, Dublin Branch.

Fixed income investments made by the sub-fund would be loss-making if interest rates rise, so repayments made before maturity may result in losses for the investor.

It should be noted that the estimated net yield of the sub-fund does not protect investors from the effect of inflation during the period until maturity, so that the actual return (i.e. discounting inflation) could be lower or even negative.

Intended Retail Investor

Investors who understand the Fund's risks, seek income from an investment focused on government bonds and credit default swaps, and intend to invest their money for the Term of the product. This Fund is designed to be used only as a component in a diversified investment portfolio and is not designed for investors who are unable to accept more than a minimal loss of their investment.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk 1 **2** 3 4 5 6 7 Higher Risk

The risk indicator assumes you keep the product until 22 June 2029.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

If the product currency differs from your home currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market

performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Details of all relevant risks can be found in the Fund's prospectus, available at www.janushenderson.com

What happens if Janus Henderson Investors Europe S.A. is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary, J.P. Morgan SE, Dublin Branch, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3.3 years
Total costs	316 EUR	598 EUR
Annual cost impact (*)	3.2%	1.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.1% before costs and 2.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
