Objectives and investment policy

The Sub-Fund aims to outperform ICE BofA 0-5 Year BB-B US High Yield Constrained Index, the Index Benchmark, over the long term by investing primarily in an actively managed portfolio of USD-denominated sub-investment grade corporate bonds.

The Sub-Fund aims to invest at least 80% of its net assets in a portfolio of USD-denominated corporate bonds with the following characteristics: Fixed or floating rate bonds; Rated below Baa3 by Moody's Investors Services, Inc. ("Moody's"), or equivalently rated by Standard & Poor's Ratings Services ("Standard & Poor's") or Fitch, Inc. ("Fitch"), or, if unrated, determined by the Sub-Investment Manager to be of comparable quality; Expected maturity of between 1 and 5.5 years; Minimum amount outstanding of USD 300 million and No Regulation S bonds.

While the Sub-Fund will primarily invest in corporate bonds issued by corporate issuers in developed markets, predominantly the US, the Sub-Fund may also invest up to 20% of its net assets in corporate bonds from emerging markets issuers. The Sub-Fund may invest up to 10% of its net asset value in Eligible Collective Investment Schemes, up to 10% in ancillary liquid assets and the sub-fund might emoliy futures, credit default swaps, options, total-return swaps and FX-forwards for efficcient portfolio management or investment purposes. The Sub-Investment Manager is actively managed with reference to the Index Benchmark and it uses a combination of quantitative analysis and fundamental research (a "quantamental" approach) as the primary basis for constructing the Sub-Fund's portfolio. Further information on the quantitative analysis and fundamental research can be found in the Supplement. The portfolio of securities will be constructed systematically using a portfolio optimisation tool developed by the Sub-Investment Manager. In managing the Sub-Fund's risk profile relative to the Index Benchmark, the Sub-Investment Manager will seek to target a tracking error of 1.0 - 1.5% over the market cycle and to maintain a similar interest rate duration to the Index Benchmark (typically within +/-0.5 years).

The Sub-Fund is an Article 6 fund for the purposes of SFDR

- The Share Class of the Sub-Fund distributes income.
- This Sub-Fund may not be appropriate for short-term investment.
- The Share Class is denominated in EUR. The Sub-Fund is denominated in USD.

- In normal conditions, Authorised Participants may deal in shares directly with the Sub-Fund. Other investors can deal in shares daily through an intermediary on stock exchanges on which the shares are traded.

For more information on the Share Class of the Sub-Fund, please see the supplement for the Sub-Fund and the prospectus of Janus Henderson ICAV, available on the product pages of www.jhetf.com.

Risk and reward profile

Lower risk **Higher risk**

Typically lower rewards Typically higher rewards

1	2	3	**4**	5	6	7

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class.

The risk category shown is not guaranteed and may shift over time.

The lowest category (Category 1) does not mean 'risk free'.

The Share Class is rated 4 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

Active Management: Active management techniques that have worked well in normal market conditions could prove ineffective or negative for performance at other times.

Credit Risk: An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates: When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

High Yield Bonds: While high yield (non-investment grade) bonds generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

County or Region: High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Derivatives: Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity: Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty and Operational Risks: Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information on the risks to the Sub-Fund, please see the supplement for the Sub-Fund and the prospectus of Janus Henderson ICAV, available on the product pages of www.jhetf.com

The Index is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Sub-Fund's prospectus for full disclaimer.

Charges for this Share Class

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge: None*

Exit charge: None*

Charges taken from the Sub-Fund over a year

Ongoing charges: 0.54%

Charges taken from the Sub-Fund under certain specific conditions

Performance fee: None

For more information about charges, please see the section "Fees and Expenses" of the Sub-Fund's prospectus and supplement, which is available a twww.jhetf.com.

Ongoing charges have not been based on an ex-post calculation as the Sub-Fund was launched less than one calendar year ago. Ongoing charges have accordingly been estimated based on the expected total of charges that will be taken from the assets of the Sub-Fund over the course of a year, in accordance with the Sub-Fund's supplement. It excludes portfolio transaction costs and taxes or duty charges for portfolio re-balancing, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking if any.

* Not applicable to secondary market investors. Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised Participants dealing directly with the Sub-Fund will pay the transaction costs related to their subscriptions and redemptions.

Past performance

- Past performance is not a reliable indicator of future returns.
- The Sub-Fund was launched on 27 January 2026
- The Share Class was launched on None.
- Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
- The past performance has been calculated in EUR. The base currency of the Sub-fund and Index is in USD.

This chart has been left intentionally blank as there is less than one year's performance data.
