

## MULTI-SECTOR INCOME FUND

Class A2 HEUR ISIN: IE00BLK24558  
Fund Currency: USD Share Class Currency: EUR

A sub-fund of Janus Henderson Capital Funds plc, an Irish Investment Company managed by Henderson Management S.A.

### Objective and investment policy

#### Objective

The Fund aims to provide a high income with the potential for some capital growth over the long term.

Performance target: To outperform the Bloomberg Barclays US Aggregate Bond Index by 1.25% per annum, before the deduction of charges, over any 5 year period.

#### Investment policy

The Fund invests at least 80% of its assets in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds and asset-backed and mortgage-backed securities, issued by governments, companies or any other type of issuer.

The Fund may also hold other assets including bonds of other types from any issuer, cash and money market instruments.

The investment manager may use derivatives (complex financial instruments), including total return swaps, to reduce risk, to manage the Fund more efficiently, or to generate additional capital or income for the Fund.

The Fund is actively managed with reference to the Bloomberg Barclays US Aggregate Bond Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

#### Strategy

The investment manager seeks to identify future winners and losers to express their high-conviction views. A 'bottom-up' fundamentally driven investment process focused on companies around the world committed to transforming and improving their balance sheets, free cash flow generation, quality of management and security valuation drive security selection. A dynamic 'top down' (market and economic analysis) framework enables the investment manager to make active sector allocation decisions based upon assessment of the stage of credit cycle, form views on market outlook, identify opportunities and take an appropriate amount of risk.

**Distribution policy** This share class accumulates income which is retained within the price of the share class.

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at [www.janushenderson.com](http://www.janushenderson.com).

### Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Default Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

**High Yield Bonds** The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

**Prepayment and Extension** Callable debt securities, such as some asset-backed or mortgage-backed securities (ABS/MBS), give issuers the right to repay capital before the maturity date or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the fund may be impacted.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Exchange Rates** If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Counterparties** The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.

**Currency Hedging** When the Fund, or a hedged share class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

For more information please see the Fund Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*	
Entry Charge	5.00%
Exit Charge	0.00%

\* The charges shown are maximum figures. In some cases you may pay less.

## Past performance

## Charges taken from the Fund over a year

Ongoing Charges	1.35%
-----------------	-------

The ongoing charge figure is estimated because the Fund is relatively new and has insufficient track record for us to calculate it exactly. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

The ongoing charges includes fees payable to Distributors. Where the ongoing charges exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the Fund's outperformance target (before the deduction of charges) has been achieved.

For more information please see the Fund Prospectus.

The past performance is calculated in EUR.

The Fund was launched in December 2019 and the share class was launched in March 2020.

Insufficient data is available to provide past performance figures. Past performance is not a guide to future performance.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the Share Class after the deduction of charges.

The Fund does not aim to track the performance of the index.

## Practical information

The depositary is JP Morgan Bank (Ireland) Plc.

Janus Henderson Multi-Sector Income Fund is a sub-fund of Janus Henderson Capital Funds plc, an umbrella fund with segregated liability between sub-funds. The assets of this Fund are segregated from other sub-funds of Janus Henderson Capital Funds plc. This document describes a share class of the Fund.
