Dear Shareholder,

RE: Notification of amendment to the investment policy of the Janus Henderson US Venture Fund (the “Fund”), a sub-fund of the Company

We are writing to you as a Shareholder in the Fund to inform you of the following proposals to amend the investment policy of the Fund to introduce a performance target for the Fund and, in line with recent regulatory guidelines, to include additional disclosure in the Prospectus on the use of a benchmark in managing the Fund.

- The performance target for the Fund will be to outperform the Russell 2000® Growth Index (the “Benchmark”) by 2% per annum, before the deduction of charges, over any 5 year period.
- The Fund is actively managed with reference to the Benchmark, which is broadly representative of the companies in which the Fund may invest. The Sub-Investment Adviser has discretion to choose individual investments for the Fund with weightings different to the Benchmark or not in the Benchmark, but at times the Fund may hold investments similar to the Benchmark.

In addition, the Prospectus is being amended to reduce the amount which the Fund can invest in the securities of non-US issuers, which are generally traded on Regulated Markets that are not considered Developing Markets, from 25% to 20% of its net asset value. This proposed change is being made to more accurately reflect the current investment portfolio of the Fund.

Finally, the disclosure on the Fund’s investment strategy is being enhanced to provide that the Sub-Investment Adviser follows a fundamental, research-driven strategy, seeking to identify innovative companies with distinct advantages over their competitors, which allow them to protect market share and/or profitability. Commonly referred to as stock picking or “bottom-up” investing, portfolios of fundamental-based investments are built one security at a time following intensive in house research into each company. Areas of research focus can include the company's management, financials, competitive strengths and weaknesses, earnings growth prospects and numerous other metrics. This approach rests on a belief that some companies have inherent strengths for creating shareholder value over time, have superior prospects to their peer groups and should therefore outperform even in challenging industrial and economic circumstances. The purpose of a fundamental investment approach is to identify and invest in such companies.
