 - futures, options and swaps and other financial derivative instruments ("FDI") for efficient portfolio management purposes. Such instruments, in general, involve specific risks (e.g. counterparty, liquidity, leverage and credit risk) and costs and may result in losses to the sub-fund.
 - futures, options and swaps and other FDI for investment purposes, up to 10% of the net asset value ("NAV") of the sub-fund. Given the leverage effect of FDI, such investments may result in substantial loss (as much as 100% of the NAV of the relevant sub-fund);
 - futures, options and swaps and other FDI extensively for investment purposes. Given the leverage effect of FDI, such investments may result in substantial loss (as much as 100% of the NAV of the relevant sub-fund);
 - debt securities rated below investment grade;
 - fixed and floating rate investment grade bonds; and
 - mortgage and asset-backed securities and/or in index/structured securities. These financial instruments may be rated below investment grade.
- Investing in any one of the above instruments may involve substantial credit/counterparty, market, liquidity, currency, leverage, index, interest, swap and downgrading risks. If the issuers default, or such securities or their underlying assets, cannot be realised or perform badly, investors' entire investments may be lost.
- Some sub-funds may at its discretion (i) pay dividends out of the capital of the sub-fund, and (ii) pay dividends out of gross income while charging all or part of the fees and expenses to the capital of the sub-fund, resulting in an increase in distributable income available for the payment of dividends by the sub-fund and therefore, the sub-fund may effectively pay dividends out of capital. This may result in an immediate reduction of the sub-fund's net asset value per share, and it amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
