PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?
▪ The Fund is <u>only</u> suitable for investors who:
  ▪ seeks to provide an income with the potential for capital growth over the long term; and
  ▪ are comfortable with the volatility and risks of a global high yield bond fund.
  ▪ The principal may be at risk.
	<u>Further Information</u>
	Refer to "Investment Objectives and Policies" and "Risk Factors" in the Singapore Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN? ▪ The Fund is a sub-fund of the Janus Henderson Horizon Fund, a UCITS constituted in Luxembourg that seeks to provide an income with the potential for capital growth over the long term by investing in sub investment grade corporate debt securities. With effect from 31 October 2022, the Fund promotes environmental and social characteristics, as defined under Article 8 of SFDR. ▪ The Fund currently offers Class A Accumulation (sub-class 2) and Class A Distribution (sub-class 4 and sub-class 5) shares denominated in its Base Currency and certain other currencies. ▪ No distribution will be made in respect of Accumulation Shares. ▪ Periodical distributions of investment income and net realised and unrealised capital gains may be made to holders of Distribution Shares depending on the Distribution Share Class you are invested in. Distributions made in respect of the Distribution Shares may reduce the net asset value of Distribution Shares of the Fund.	Refer to "Sub-Funds" in the Singapore for further information on features of the product.

PRODUCT HIGHLIGHTS SHEET

Investment Strategy	
▪ The Fund will invest at least 80% of its net assets in sub investment grade corporate debt securities of issuers with a credit rating equivalent to BB+ or lower. The Fund can invest in fixed and variable rate and index related securities issued by corporate, government, supranational institutions and local and regional agencies. The Fund may use derivative instruments with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. ▪ The Fund is actively managed, seeking outperformance of the ICE BofAML Global High Yield Constrained Index (100% Hedged) by 1.75% per annum, before the deduction of charges, over any 5 year period. The Fund's leverage level is expected to be 100% of its total NAV. The leverage level will vary over time and may increase under certain market conditions. This methodology does not make a distinction between financial derivative instruments that are used for investment or risk reduction purposes. As a result, strategies that aim to reduce risk will contribute to an increased level of leverage for the Fund.	Refer to "Investment Objectives and Policies" and "Risk Factors" in the Singapore Prospectus for structure of the Fund.
Parties Involved	
WHO ARE YOU INVESTING WITH? ▪ The Company is Janus Henderson Horizon Fund. ▪ The Management Company is Janus Henderson Investors Europe S.A.. ▪ The Investment Manager is Janus Henderson Investors UK Limited. ▪ The Sub-Investment Manager is Janus Henderson Investors US LLC. ▪ The Depositary is BNP Paribas, Luxembourg Branch.	Refer to "Management and Administration" in the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? There is no guarantee that investors will get back the invested amount given that the value of investments and its dividends are subject to market conditions and therefore may go up as well as down. These risk factors may cause you to lose some or all of your investment:	Refer to "Risk Factors" in the Singapore Prospectus and "Investment and Risk Considerations" in the Luxembourg Prospectus for further information on risks of the product.
Market and Credit Risks	
▪ **Market risks in global markets.** The value of the investments in the Fund may go up or down due to changing economic, political, regulatory, social development or market conditions that impact the share price of the companies that the Fund invests in. ▪ **Currency.** Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall. ▪ **Fixed income.** Investments in fixed income instruments are subject to default/credit risk of the issuers, the risk of which is greater the lower the credit quality of the bond, interest rate risk as bond prices move inversely to changes in interest rates and liquidity risk when there is low liquidity in the secondary bond market.	
Liquidity Risks	
▪ **The Fund is not listed and you can redeem only on Dealing Days.** There is no secondary market for the Fund. All redemption requests should be made to the Investment Manager. ▪ **Flexibility in redemption may be restricted.** The Fund may, under the Articles of Incorporation, defer the redemptions or suspend the determination of the net asset value of the shares of the Fund in certain circumstances.	

- **Difficulty in realising the value of investments readily may delay payment of redemption proceeds.** Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.

Product-Specific Risks

- **Non-investment grade securities and/or distressed securities** The Fund may invest in non-investment grade or distressed securities which generally are subjected to more risk and volatility due to reduced credit worthiness, liquidity and a greater chance of default, which can thereby expose the Fund to potential losses.
- **CoCos.** CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares of the issuer or to be partly or wholly written off.
- **ABS and MBS.** ABS and MSB are callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date), that can be impacted from prepayment or extension of maturity. The value of your investment may fall as a result.
- **Derivatives risks and Leverage.** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- **OTC markets.** Investments in OTC markets are speculative and relatively illiquid, hence are subject to high volatility. OTC investment's valuation may be difficult to obtain as reliable information of the issuers and the risks associated to the issuers' business is not publicly available. OTC derivatives have the risk of incorrectly valuing or pricing and they may not fully correlate with the underlying assets. Investment in OTC markets carries the risk that a counterparty may default on its obligations. In the event of a bankruptcy or insolvency of a counterparty, the Fund could experience delays in liquidating the position and significant losses.
- **Currency hedging.** When the Fund, or a currency hedged share class of the Fund, seeks to mitigate (hedge) exchange rate movements of a currency relative to the Fund's base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.
- **Capital growth.** In addition to income, the sub-class 4 and sub-class 5 shares may distribute realised and unrealised capital gains and original capital invested. Fees, charges and expenses are also deducted from capital. Both factors may result in capital erosion and reduced potential for capital growth. Investors should also note that these distributions may be treated (and taxable) as income depending on local tax legislation.
- **Sustainability risks.** A sustainability risk means an environmental, social or governance (ESG) event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of the investment. In managing the Sub-Fund, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the Sub-Fund.

FEES AND CHARGES

WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?

Additional fees may be imposed and payable to appointed distributors that are in addition to the maximum Sales Charge disclosed below.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

- The last available NAV of the Shares of the Fund for the relevant Dealing Day may be obtained two days after that Dealing Day from the website **http://www.janushenderson.com.**

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

- You can exit the Fund at any time by submitting a redemption form through any authorised agent or distributor or any other sales channels, if applicable.
- However, you will have to take the risk for any price changes in the NAV of the Fund since it was purchased and pay a Trading Fee of up to 1% if redeemed within 90 days of purchase. The applicant has no right to cancel the deal but can sell back their shares to the Company with associated costs.
- You will normally receive the redemption proceeds within 10 Singapore Business Days from the time your request to exit from the Fund is received and accepted.
- Your exit price is determined as follows:
  - If you submit the redemption request before the Dealing Cut-Off, you will be paid a price based on the NAV of the Fund applicable to that Dealing Day.
  - If you submit the redemption order after Dealing Cut-Off or on a Singapore Business Day which is not a Dealing Day, you will be paid a price based on the NAV applicable to the next Dealing Day.
- The redemption proceeds will be calculated by multiplying the number of shares to be redeemed by the exit price per Share when it has been ascertained later and thereafter deducting any applicable Trading Fee. Numerical examples of calculation of redemption proceeds are as follows:

e.g.	1,000 Shares Redemption request	x	US$10.01 NAV	=	US$10,010.00 Redemption Proceeds

Refer to "Subscription for Shares", "Redemption of Shares" and "Obtaining Price Information" in the Singapore Prospectus for further information on valuation and exiting from the product.
