Janus Henderson Fund

Emerging Markets Fund Class H2 EUR ISIN: LU0995139697

A sub-fund of Janus Henderson Fund, a Luxembourg SICAV managed by Janus Henderson Investors Europe S.A.

Fund Currency: USD Share Class Currency: EUR

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of capital growth and income over the long term.

Performance target: To outperform the MSCI Emerging Markets Index by 2% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least two-thirds of its assets in shares (equities) and equity-related securities of companies, of any size, in any industry, in emerging markets. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in emerging markets. 'Emerging markets' may be countries in the MSCI Emerging Markets Index, those included in the World Bank definition of developing (low and lower middle income) economies, or which are, in the Investment Manager's opinion, developing. The Fund may invest in companies of any size, including smaller capitalisation companies, in any industry.

The Fund may also invest in other assets including companies outside emerging markets, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the MSCI Emerging Markets Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Strategy

The Investment Manager seeks consistent risk-adjusted returns (an expression of an investment's return through how much risk is involved in producing that return) by looking to identify the most attractive opportunities within countries across various stages of economic and political development. This diverse landscape requires the Investment Manager to utilise an array of perspectives to fully evaluate these opportunities. By combining fundamental company research, market and economic analysis, a keen focus on corporate governance and quantitative input, the portfolio attempts to capture price inefficiencies across the market-cap spectrum. Where the Fund invests in sectors dominated by state-owned entities, companies within the sectors may be excluded if they are assessed by the Investment Manager as having poor corporate governance.

Other Information The Investment Manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Investment Manager considers could contribute to significant ESG harm, as further described in the prospectus.

Transaction costs In addition to the charges set out in the Charges section below, the Fund may incur a higher level of portfolio transaction costs as a result of investing in less actively traded markets. These costs are paid from the assets of the Fund and may have a material impact on your returns.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	3	4	5	**6**	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Emerging Markets Emerging markets expose investors to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures.

Sustainability Approach The sustainability approach applied may exclude potential investments which do not meet certain criteria (e.g. non-financial criteria such as ESG screens). This may cause differences in performance compared to similar products that are permitted to invest in those investments.

Derivatives and Leverage Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%

* The charges shown are maximum figures. In some cases you may pay less.

Charges taken from the Fund over a year

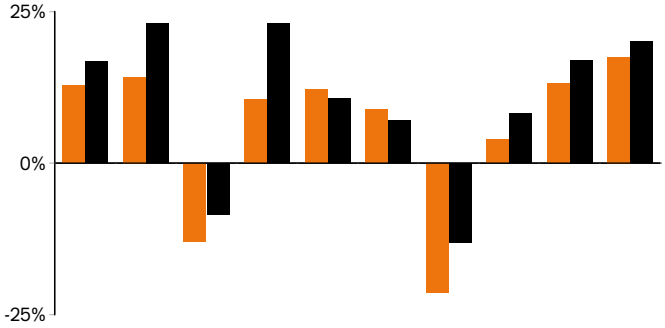

Ongoing Charges	0.94%

The ongoing charges are based on actual annualised expenses for the period ending 31 March 2026. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
	Performance (%)									
Class H2 EUR (Net of Charges)*	12.8	14.2	-13.0	10.5	12.2	8.8	-21.4	3.9	13.2	17.5
MSCI Emerging Markets NR Index +2% per annum	16.8	23.0	-8.5	23.0	10.7	7.0	-13.2	8.2	17.0	20.1

The past performance is calculated in EUR.

The Fund was launched in September 2000 and the share class was launched in December 2016.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.
