

GLOBAL PROPERTY EQUITIES FUND

Class A3q SGD ISIN: LU1316542866
Fund Currency: USD Share Class Currency: SGD

A sub-fund of Janus Henderson Horizon Fund, a Luxembourg SICAV managed by Henderson Management S.A.

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term.
Performance target: To outperform the FTSE EPRA Nareit Developed Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of real estate investment trusts (REITs) and companies, which invest in property, in any country. Securities will derive the main part of their revenue from owning, developing and managing real estate.

The Fund may also invest in other assets including cash and money market instruments.

The investment manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the FTSE EPRA Nareit Developed Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Strategy

The investment manager seeks to identify listed property companies and real estate investment trusts (REITs) that can deliver the highest total return over the long-term. The investment process follows a high conviction, 'bottom-up' (fundamental company-level) research approach aiming to identify the best risk-adjusted value from across the capitalisation spectrum.

Distribution policy This share class distributes all income, charges will be deducted from capital.

Distribution frequency Quarterly.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within the short term.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Investment Focus The Fund is focused towards particular industries or investment themes and may be heavily impacted by factors such as changes in government regulation, increased price competition, technological advancements and other adverse events.

Concentration This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.

REITs The Fund invests in real estate investment trusts (REITs) and other companies or funds engaged in property investment, which involve risks above those associated with investing directly in property. In particular, REITs may be subject to less strict regulation than the Fund itself and may experience greater volatility than their underlying assets.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparties The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

For more information please see the Fund Prospectus.
