KEY INVESTOR INFORMATION
This document provides you with Key Investor Information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Janus Henderson INVESTORS

Janus Henderson Horizon Fund

Strategic Bond Fund Class GU3q HGBP ISIN: LU1627466425

A sub-fund of Janus Henderson Horizon Fund, a Luxembourg SICAV managed by Janus Henderson Investors Europe S.A.
Fund Currency: USD Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of income and capital growth, over the long term (5 years or more).

Investment policy

The Fund invests in bonds of any quality, including high yield (non-investment grade) bonds, asset-backed and mortgage-backed securities and distressed debt, issued by governments, companies or any other type of issuer, in any country. The Fund may invest up to 50% in total return swaps.

Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The Fund may also invest in other assets including perpetual bonds, convertible bonds, contingent convertible bonds (CoCos), company shares (equities), preference shares, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed without reference to a benchmark. The Investment Manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

Strategy

The Fund follows a flexible strategy to construct a diverse portfolio of investments from across the spectrum of fixed income assets. The Investment Manager actively varies the allocation to different types of bonds to suit the prevailing economic environment, based on careful macroeconomic research and credit analysis. At times in the market cycle, the fund will be expected to have higher interest rate sensitivity, which may result in significant underperformance or outperformance, particularly when government bond yields move more quickly or to a greater extent than anticipated. The Investment Manager adopts this approach as it is believed this can be beneficial for long-term performance.

Other Information The Investment Manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Investment Manager considers could contribute to significant ESG harm, as further described in the prospectus.

Distribution policy This share class distributes all income, charges will be deducted from capital.

Distribution frequency Quarterly.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	3	**4**	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Sensitivity to Interest Rates When interest rates rise (or fall), the prices of different bonds will be affected differently. In particular, bond prices generally fall when interest rates rise or are expected to rise. This is especially true for bonds with a higher sensitivity to interest rate changes. A material portion of the fund may be invested in such bonds (or bond derivatives), so rising interest rates may have a negative impact on fund returns.

High Yield Bonds While high yield (non-investment grade) bonds generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Prepayment and Extension Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted.

Contingent Convertible Bonds (CoCos) CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares/units of the issuer or to be partly or wholly written off.

Country or Region High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio.

Derivatives and Leverage Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Currency Hedging When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 1.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

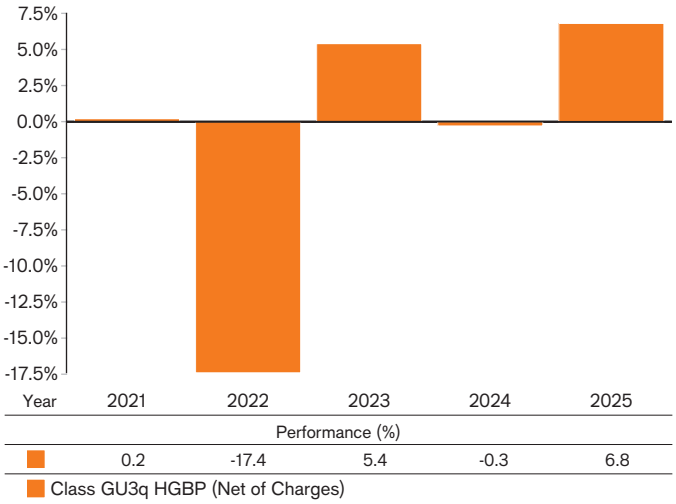

Ongoing Charges	0.56%

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2025. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance

The past performance is calculated in GBP.

The Fund was launched in July 2017 and the share class was launched in April 2020.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Practical information

Depositary: BNP Paribas, Luxembourg Branch

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of shares in the Fund or any additional information on the Fund, or to obtain the Company's prospectus or the annual/semi-annual report, please visit www.janushenderson.com.
