

## GLOBAL EQUITY MARKET NEUTRAL FUND

Class G£ Acc (hedged) ISIN: LU2152367731  
Fund Currency: USD Share Class Currency: GBP

A sub-fund of Janus Henderson Fund, a Luxembourg SICAV managed by Henderson Management S.A.

### Objective and investment policy

#### Objective

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period, and particularly over the shorter term the Fund may experience periods of negative returns. Consequently your capital is at risk.

Performance target: To outperform the US Base Rate, after the deduction of charges, over any 3 year period.

#### Investment policy

The Fund invests in shares and makes extensive use of derivatives (complex financial instruments) to take both 'long' and 'short' positions in companies the investment manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario.

Typically, the Fund will match each long position in a company with an equivalent sized short position in another company (known as a 'pair'), with the aim of benefitting from price divergence between the long and short exposures of the pair, while minimising the effect of wider market movements.

The Fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives.

The investment manager may also use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the US Base Rate as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). For currency

hedged Share Classes, the central bank rate that corresponds with the relevant Share Class currency is used as the basis of the performance comparison and for calculating performance fees. The investment manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

#### Strategy

The investment manager targets positive returns, with low correlation to movements in stock markets. Returns are sought through balancing positions in companies with attractive prospects (long positions) with positions in companies with unattractive prospects (short positions), thereby attempting to isolate the fund from moves within equity markets more widely. The process captures the best ideas from across Janus Henderson's equity teams globally.

**Distribution policy** This share class accumulates income which is retained within the price of the share class.

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

### Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Equities** Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

**Derivatives** The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other

risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Exchange Rates** If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

**Currency Hedging** When the Fund, or a hedged share class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Transaction Costs (higher turnover strategy)** The Fund involves a high level of buying and selling activity and as such will incur a higher level of transaction costs than a fund that trades less frequently. These transaction costs are in addition to the Fund's Ongoing Charges.

**Counterparties** The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	5.00%
--------------	-------

Exit Charge	0.00%
-------------	-------

\* The charges shown are maximum figures. In some cases you may pay less.

### Charges taken from the Fund over a year

Ongoing Charges	0.76%
-----------------	-------

## Past performance

The ongoing charge figure is estimated because the share class has insufficient track record for us to calculate it exactly.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

### Charges taken from the Fund under certain specific conditions

Performance fee	20.00%*
-----------------	---------

\*20% of any returns that, subject to a High Water Mark, the Fund achieves above the Bank of England Base Rate. The actual amount charged in the Fund's last financial year amounted to 0.00%.

For more information please see the Fund Prospectus.

The past performance is calculated in GBP.

The Fund was launched in February 2017 and the share class was launched in April 2020.

Insufficient data is available to provide past performance figures.

Past performance is not a guide to future performance.

The Fund does not aim to track the performance of the index.
